

STANDARD OPERATING PROCEDURE
ELI LILLY AND COMPANY
North American Logistics Operations

Computer Access Authorization for NALO Tech@Lilly Applications

USD-SOP-Comp Access Author-001

SUPERSEDES 001-003113

PURPOSE In compliance with the Lilly Quality Standards and Practices, Computer System Validation (CSV), this procedure outlines the details required to support the Security Plan residing in the NALO (North American Logistics Operations) validation package that includes granting, changing or removing various user levels of access accounts in the computer system. The procedure scope includes Worldlink, Exacta, AS/RS, and Autostore within NALO.

AREAS INVOLVED NALO Operations, NALO Tech@Lilly, and NALO Quality Assurance

REASONS FOR REVISION All revisions are marked with an (*):
To remove Fresno.

- Rationale: CC40755631

APPROVALS Approval of this procedure requires the signature of:

Management, NALO Operations
Management, NALO Tech@Lilly
Management, NALO Quality Assurance

Annual Access Roster Review	11

INTRODUCTION

Access to a secured validated computer system must be controlled and documented. Access accounts are granted, changed, or inactivated by an application and training process.

Note: The following are Attachments listed within this procedure and reside in the electronic document management system:

- NALO Application Security Form, Attachment A (USD-SOP-Comp Access Author-001, Attachment A)
 - Autostore System Annual Security Access Review Form, Attachment B (USD-SOP-Comp Access Author-001, Attachment B)
 - AS/RS System Annual Security Access Review Form, Attachment C (USD-SOP-Comp Access Author-001, Attachment C)
-

**APPLICATION
FOR ACCOUNTS**

NALO supervision follows these steps to apply for system account for any level user.

Step	Action								
1	Ensure that the applicant has a Lilly Systems User ID, i.e., AB12345 (Lilly) or ABX1234 (non-Lilly). One can be obtained by calling the Computer Support Center at 317-277-7000.								
2	Ensure that the applicant has the proper curriculum assignment(s) based upon how the requested system will be used in the functional area. See the Learning and Development Team for assistance with curriculum assignments. See applicable NALO Security Plan for description of system roles.								
3	<table><tr><td colspan="2">Process:</td></tr><tr><th>If</th><th>Then</th></tr><tr><td>Exacta and/or Worldlink</td><td> - Request access through 'MyAccess at Lilly' (Global account registration and access roster review system). </td></tr><tr><td>Autostore and/or AS/RS</td><td> - Obtain a NALO Application Security Form, Attachment A. Note: Attachment A is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. - Assist the applicant with completion of the form. Ensure understanding of the confidentiality of data and systems as described in Attachment A. Verify applicant signature and date are complete. - Sign and date the application for supervision approval. - Submit the completed application to the Security Administrator for processing. </td></tr></table>	Process:		If	Then	Exacta and/or Worldlink	Request access through 'MyAccess at Lilly' (Global account registration and access roster review system).	Autostore and/or AS/RS	- Obtain a NALO Application Security Form, Attachment A. Note: Attachment A is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. - Assist the applicant with completion of the form. Ensure understanding of the confidentiality of data and systems as described in Attachment A. Verify applicant signature and date are complete. - Sign and date the application for supervision approval. - Submit the completed application to the Security Administrator for processing.
Process:									
If	Then								
Exacta and/or Worldlink	Request access through 'MyAccess at Lilly' (Global account registration and access roster review system).								
Autostore and/or AS/RS	- Obtain a NALO Application Security Form, Attachment A. Note: Attachment A is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. - Assist the applicant with completion of the form. Ensure understanding of the confidentiality of data and systems as described in Attachment A. Verify applicant signature and date are complete. - Sign and date the application for supervision approval. - Submit the completed application to the Security Administrator for processing.								

ESTABLISHING USER ACCOUNTS

The Security Administrator follows these steps to establish user accounts and grant access to the computer system.

Step	Action						
1	Upon receipt of user access request task from ServiceNow through MyAccess or hardcopy access form, verify action requested (add, change, delete). Perform appropriate action corresponding to the request.						
2	Process: <table> <tr> <th>If</th><th>Then</th></tr> <tr> <td>Exacta</td><td> - Update the Exacta Access Screens by entering the user information and setting the access levels as defined for the particular user level. - Logon to the Exacta Manager application - Select Administration / Operator Administration from the main menu. - Type in the appropriate operator type from the following list. Use the operator type corresponding to the "Access Requested" on the NALO Application Security Form. - For Exacta Operator, type in EXOPR - Exacta Power User, type in EXPOW - For Exacta Operator2 with weight check override, type in EXOPR2 - For NALO Tech@Lilly, type in EXSYS. - Click the submit button. - Double Click the copy icon in the far right column of the table. - Type in the user's system id according to the accepted naming convention, the user's password and the user's name (e.g. JANE DOE) on the Operator Details screen. - Click on the save button. - Click OK on the Record(s) Updated Successfully window. - Type in the other user system id and name if there is another user to add, or click on the cancel button to exit the Operator Administration screen. - Click the Logout button on the main menu. </td></tr> <tr> <td>Worldlink</td><td> Create the userid in the Worldlink system in the appropriate user group. Detailed instructions follow: - Logon to the Worldlink application - Select Configuration, Users, from the top menu bar. - Click the ADD button. - Select the appropriate user group. *Select by description Enfield or Plainfield - Select Shipper, Power Shipper, or US Dist IT - Fill in the user details, including logon ID, name and location. - Do NOT click "Prompt User to Change Password". - Click OK - Click the Edit button to open the new user information </td></tr> </table>	If	Then	Exacta	- Update the Exacta Access Screens by entering the user information and setting the access levels as defined for the particular user level. - Logon to the Exacta Manager application - Select Administration / Operator Administration from the main menu. - Type in the appropriate operator type from the following list. Use the operator type corresponding to the "Access Requested" on the NALO Application Security Form. - For Exacta Operator, type in EXOPR - Exacta Power User, type in EXPOW - For Exacta Operator2 with weight check override, type in EXOPR2 - For NALO Tech@Lilly, type in EXSYS. - Click the submit button. - Double Click the copy icon in the far right column of the table. - Type in the user's system id according to the accepted naming convention, the user's password and the user's name (e.g. JANE DOE) on the Operator Details screen. - Click on the save button. - Click OK on the Record(s) Updated Successfully window. - Type in the other user system id and name if there is another user to add, or click on the cancel button to exit the Operator Administration screen. - Click the Logout button on the main menu.	Worldlink	Create the userid in the Worldlink system in the appropriate user group. Detailed instructions follow: - Logon to the Worldlink application - Select Configuration, Users, from the top menu bar. - Click the ADD button. - Select the appropriate user group. *Select by description Enfield or Plainfield - Select Shipper, Power Shipper, or US Dist IT - Fill in the user details, including logon ID, name and location. - Do NOT click "Prompt User to Change Password". - Click OK - Click the Edit button to open the new user information
If	Then						
Exacta	- Update the Exacta Access Screens by entering the user information and setting the access levels as defined for the particular user level. - Logon to the Exacta Manager application - Select Administration / Operator Administration from the main menu. - Type in the appropriate operator type from the following list. Use the operator type corresponding to the "Access Requested" on the NALO Application Security Form. - For Exacta Operator, type in EXOPR - Exacta Power User, type in EXPOW - For Exacta Operator2 with weight check override, type in EXOPR2 - For NALO Tech@Lilly, type in EXSYS. - Click the submit button. - Double Click the copy icon in the far right column of the table. - Type in the user's system id according to the accepted naming convention, the user's password and the user's name (e.g. JANE DOE) on the Operator Details screen. - Click on the save button. - Click OK on the Record(s) Updated Successfully window. - Type in the other user system id and name if there is another user to add, or click on the cancel button to exit the Operator Administration screen. - Click the Logout button on the main menu.						
Worldlink	Create the userid in the Worldlink system in the appropriate user group. Detailed instructions follow: - Logon to the Worldlink application - Select Configuration, Users, from the top menu bar. - Click the ADD button. - Select the appropriate user group. *Select by description Enfield or Plainfield - Select Shipper, Power Shipper, or US Dist IT - Fill in the user details, including logon ID, name and location. - Do NOT click "Prompt User to Change Password". - Click OK - Click the Edit button to open the new user information

Detailed instructions follow: - Logon to requested system. - Select 'Enterprise Portal' from initial screen - From the menu on the left of the screen, select the follow sequence of selections: - Configuration & Maintenance - User Management - Users - On the upper left of the screen, select the icon 'New User' and enter the following information on the initial user screen - User ID – User ID from the access form (Case sensitive) - Full Name – User name from the access form - Description – Optional – not normally entered - Password – Initial default password assigned by admin. - Confirm Password – Re-enter assigned password Click OK - You will be taken to the User Detail screen – Select 'Edit' Icon - Enter the following information: - Email – Email from the access form - Phone – Optional, enter if provided on the form - Ensure the 'Enabled' check box is checked - Remove the Voice Password check box (if checked) - Select Security Role indicated on the access form Click the 'Save' Icon - Sign and date the Application Security Form, Attachment A and retain in the Security Account Binder in accordance with the Global Records and Information Management Retention Schedule.
If	Then				
Autostore or AS/RS	Create the userid in the Autostore or AS/RS system in the appropriate user group. Detailed instructions follow: - Logon to requested system. - Select 'Enterprise Portal' from initial screen - From the menu on the left of the screen, select the follow sequence of selections: - Configuration & Maintenance - User Management - Users - On the upper left of the screen, select the icon 'New User' and enter the following information on the initial user screen - User ID – User ID from the access form (Case sensitive) - Full Name – User name from the access form - Description – Optional – not normally entered - Password – Initial default password assigned by admin. - Confirm Password – Re-enter assigned password Click OK - You will be taken to the User Detail screen – Select 'Edit' Icon - Enter the following information: - Email – Email from the access form - Phone – Optional, enter if provided on the form - Ensure the 'Enabled' check box is checked - Remove the Voice Password check box (if checked) - Select Security Role indicated on the access form Click the 'Save' Icon - Sign and date the Application Security Form, Attachment A and retain in the Security Account Binder in accordance with the Global Records and Information Management Retention Schedule.				

| 3 | For requests submitted via myAccess, return to the ServiceNow Task and document the following: - User Name - User ID - Type of access requested (new, change, removal / inactivate) - Level of access requested Complete the ServiceNow Task and close it. For paper-based requests, proceed to Step 4. |
| 4 | Notify the applicant and supervision by electronic mail that access to the requested area(s) is available. Notify the user of the new password (depending on the system). |

**TEMPORARY
ACCESS**

Temporary access (e.g., for a project), is requested through the process defined in this procedure. Removal of temporary access is triggered by a CAPA, tied to the end of the project associated with the temporary access. If temporary access is only needed for less than a day (e.g., third-party access to fix an issue causing a system outage), then access to the needed system could be provided via a screen share with someone who already has the required access. This individual with access can be guided through the process of correcting the issue. Once the issue is corrected the screen share will be terminated, ending the access.

**APPLICATION
FOR ACCOUNT
CHANGES**

NALO supervision follows these steps to apply for user access account changes.

Step	Action						
1	Process: <table> <tr> <th>If</th><th>Then</th></tr> <tr> <td>Exacta or Worldlink</td><td> - If applicable, ensure that the applicant has the proper curricula assignment(s) based upon how application(s) are used in the operational area. See Learning and Development for assistance with curricula assignments. See NALO Security Plan for description of system roles. - Request access modification through 'MyAccess at Lilly' (Global account registration and access roster review system). MyAccess is started by typing 'myaccess.lilly.com' into your browser while signed on to the Lilly network. </td></tr> <tr> <td>Autostore or AS/RS</td><td> - Obtain a NALO: Application Security Form, Attachment A. Note: Attachment A is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. Note: Obtain a copy of the current Application Security Form from the Security Administrator, if necessary. - If applicable, ensure that the applicant has the proper curricula assignment(s) based upon how application(s) are used in the operational area. See Learning and Development for assistance with curricula assignments. - Complete the NALO: Application Security Form, Attachment A. Mark the "Change" box on the form and enter what the change is on the line next to the Change Is box. - Sign and date the application for supervision approval. - Submit the change application to the Security Administrator for processing. </td></tr> </table>	If	Then	Exacta or Worldlink	- If applicable, ensure that the applicant has the proper curricula assignment(s) based upon how application(s) are used in the operational area. See Learning and Development for assistance with curricula assignments. See NALO Security Plan for description of system roles. - Request access modification through 'MyAccess at Lilly' (Global account registration and access roster review system). MyAccess is started by typing 'myaccess.lilly.com' into your browser while signed on to the Lilly network.	Autostore or AS/RS	- Obtain a NALO: Application Security Form, Attachment A. Note: Attachment A is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. Note: Obtain a copy of the current Application Security Form from the Security Administrator, if necessary. - If applicable, ensure that the applicant has the proper curricula assignment(s) based upon how application(s) are used in the operational area. See Learning and Development for assistance with curricula assignments. - Complete the NALO: Application Security Form, Attachment A. Mark the "Change" box on the form and enter what the change is on the line next to the Change Is box. - Sign and date the application for supervision approval. - Submit the change application to the Security Administrator for processing.
If	Then						
Exacta or Worldlink	- If applicable, ensure that the applicant has the proper curricula assignment(s) based upon how application(s) are used in the operational area. See Learning and Development for assistance with curricula assignments. See NALO Security Plan for description of system roles. - Request access modification through 'MyAccess at Lilly' (Global account registration and access roster review system). MyAccess is started by typing 'myaccess.lilly.com' into your browser while signed on to the Lilly network.						
Autostore or AS/RS	- Obtain a NALO: Application Security Form, Attachment A. Note: Attachment A is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. Note: Obtain a copy of the current Application Security Form from the Security Administrator, if necessary. - If applicable, ensure that the applicant has the proper curricula assignment(s) based upon how application(s) are used in the operational area. See Learning and Development for assistance with curricula assignments. - Complete the NALO: Application Security Form, Attachment A. Mark the "Change" box on the form and enter what the change is on the line next to the Change Is box. - Sign and date the application for supervision approval. - Submit the change application to the Security Administrator for processing.						

**CHANGING
USER
ACCOUNTS**

The Security Administrator follows these steps to change user accounts in the US Local Tech@Lilly Applications.

Step	Action						
1	Upon receipt of user access request task from ServiceNow through MyAccess or hardcopy access form, verify action requested (add, change, delete). Perform appropriate action corresponding to the request.						
2	Process: <table> <tr> <th>If</th><th>Then</th></tr> <tr> <td>Exacta</td><td> - Log on to the Exacta Manager application. - Select Administration / Operator Administration from the main menu. - Type in the "access requested" value indicated in the MyAccess request in the Operator ID field or select from pull down list (Selecting security template for requested access). - Click Submit to display the default values for the access requested, for example, Operator. - Click the copy link in the far right column of the Operator Administration table. - Enter the Operator ID and select warehouse number from drop down list. - Enter operator's name on the Operator Details screen. - Click on the Save button. </td></tr> <tr> <td>Worldlink</td><td> Modify the userid in the Worldlink system. Detailed instructions follow: - Logon to the Worldlink application. - Select Configuration, Users, Users from the top menu bar. Find the userid whose access level will change, and select it, then click the Edit button. - If the user access level or site is changing, select the appropriate user group. *Select by description Enfield or Plainfield - Select Shipper, Power Shipper, or IT - Select the "access requested" value from the checked box on the user's completed NALO: Application Security Form, Attachment A - Change user details as needed. - Do NOT click "Prompt User to Change Password". - Click OK. - Click the Edit button to open the modified user information. - Type in the "access requested" value from the checked box on the user's completed NALO: Application Security Form, Attachment A to the Operator ID field on the Operator Administration screen. </td></tr> </table>	If	Then	Exacta	- Log on to the Exacta Manager application. - Select Administration / Operator Administration from the main menu. - Type in the "access requested" value indicated in the MyAccess request in the Operator ID field or select from pull down list (Selecting security template for requested access). - Click Submit to display the default values for the access requested, for example, Operator. - Click the copy link in the far right column of the Operator Administration table. - Enter the Operator ID and select warehouse number from drop down list. - Enter operator's name on the Operator Details screen. - Click on the Save button.	Worldlink	Modify the userid in the Worldlink system. Detailed instructions follow: - Logon to the Worldlink application. - Select Configuration, Users, Users from the top menu bar. Find the userid whose access level will change, and select it, then click the Edit button. - If the user access level or site is changing, select the appropriate user group. *Select by description Enfield or Plainfield - Select Shipper, Power Shipper, or IT - Select the "access requested" value from the checked box on the user's completed NALO: Application Security Form, Attachment A - Change user details as needed. - Do NOT click "Prompt User to Change Password". - Click OK. - Click the Edit button to open the modified user information. - Type in the "access requested" value from the checked box on the user's completed NALO: Application Security Form, Attachment A to the Operator ID field on the Operator Administration screen.
If	Then						
Exacta	- Log on to the Exacta Manager application. - Select Administration / Operator Administration from the main menu. - Type in the "access requested" value indicated in the MyAccess request in the Operator ID field or select from pull down list (Selecting security template for requested access). - Click Submit to display the default values for the access requested, for example, Operator. - Click the copy link in the far right column of the Operator Administration table. - Enter the Operator ID and select warehouse number from drop down list. - Enter operator's name on the Operator Details screen. - Click on the Save button.						
Worldlink	Modify the userid in the Worldlink system. Detailed instructions follow: - Logon to the Worldlink application. - Select Configuration, Users, Users from the top menu bar. Find the userid whose access level will change, and select it, then click the Edit button. - If the user access level or site is changing, select the appropriate user group. *Select by description Enfield or Plainfield - Select Shipper, Power Shipper, or IT - Select the "access requested" value from the checked box on the user's completed NALO: Application Security Form, Attachment A - Change user details as needed. - Do NOT click "Prompt User to Change Password". - Click OK. - Click the Edit button to open the modified user information. - Type in the "access requested" value from the checked box on the user's completed NALO: Application Security Form, Attachment A to the Operator ID field on the Operator Administration screen.

Worldlink and/or Exacta	Request inactivation through 'MyAccess at Lilly'						

INACTIVATING USER ACCOUNTS The Security Administrator follows these steps to inactivate user accounts.

Step	Action								
1	Upon receipt of user access request task from ServiceNow through MyAccess or hardcopy access form, verify action requested (add, change, delete). Perform appropriate action corresponding to the request.								
2	Process: <table> <tr> <th>If</th><th>Then</th></tr> <tr> <td>Exacta</td><td> - Logon to the Exacta Manager application. - Select Administration / Operator Administration from the main menu. - Type in the Employee Logon ID in the Operator ID field. - Select the Warehouse Number from the pull-down list. - Click Submit to display the Operator ID for selection. - Click the Edit Icon - Click on the Operator Enabled? Check Box and remove the check mark. - Click on the Save button. </td></tr> <tr> <td>Worldlink</td><td> - Logon to the Worldlink application - Select Configuration, Users, Users from the top menu bar. - Find the userid to be inactivated, and change the active flag from 'Y' to 'N' . </td></tr> <tr> <td>Autostore or AS/RS</td><td> - Logon to requested system. - Select 'Enterprise Portal' from initial screen - From the menu on the left of the screen, select the follow sequence of selections: - Configuration & Maintenance - User Management - Users - Find the requested UserID by visually scanning the list users or entering a search field such as User ID. - Select the appropriate User ID by clicking once on the user in the user list. - Select 'Edit' from the Icons at the top of the screen. - Uncheck the User Enabled check box. - Click the 'Save' icon </td></tr> </table>	If	Then	Exacta	- Logon to the Exacta Manager application. - Select Administration / Operator Administration from the main menu. - Type in the Employee Logon ID in the Operator ID field. - Select the Warehouse Number from the pull-down list. - Click Submit to display the Operator ID for selection. - Click the Edit Icon - Click on the Operator Enabled? Check Box and remove the check mark. - Click on the Save button.	Worldlink	- Logon to the Worldlink application - Select Configuration, Users, Users from the top menu bar. - Find the userid to be inactivated, and change the active flag from 'Y' to 'N' .	Autostore or AS/RS	- Logon to requested system. - Select 'Enterprise Portal' from initial screen - From the menu on the left of the screen, select the follow sequence of selections: - Configuration & Maintenance - User Management - Users - Find the requested UserID by visually scanning the list users or entering a search field such as User ID. - Select the appropriate User ID by clicking once on the user in the user list. - Select 'Edit' from the Icons at the top of the screen. - Uncheck the User Enabled check box. - Click the 'Save' icon
If	Then								
Exacta	- Logon to the Exacta Manager application. - Select Administration / Operator Administration from the main menu. - Type in the Employee Logon ID in the Operator ID field. - Select the Warehouse Number from the pull-down list. - Click Submit to display the Operator ID for selection. - Click the Edit Icon - Click on the Operator Enabled? Check Box and remove the check mark. - Click on the Save button.								
Worldlink	- Logon to the Worldlink application - Select Configuration, Users, Users from the top menu bar. - Find the userid to be inactivated, and change the active flag from 'Y' to 'N' .								
Autostore or AS/RS	- Logon to requested system. - Select 'Enterprise Portal' from initial screen - From the menu on the left of the screen, select the follow sequence of selections: - Configuration & Maintenance - User Management - Users - Find the requested UserID by visually scanning the list users or entering a search field such as User ID. - Select the appropriate User ID by clicking once on the user in the user list. - Select 'Edit' from the Icons at the top of the screen. - Uncheck the User Enabled check box. - Click the 'Save' icon								
3	For requests submitted via myAccess, return to the ServiceNow Task and document the following: - User Name - User ID - Type of access requested (new, change, removal / inactivate) - Level of access requested Complete the ServiceNow Task and close it. For paper-based requests, proceed to Step 4.								
4	Notify the supervision and applicant (if applicable) by electronic mail that the access is inactivated.								

**ACCESS ROSTER
REVIEW**

The following steps are executed at least annually to ensure all active accounts are valid. The process varies depending on whether the MyAccess tool is managing the roster review process.

Step	Action	
1	Process:	
	If	Then
	Exacta and Worldlink,	- Access Roster review notifications will automatically be sent to supervisors on a pre-determined scheduled through MyAccess. - Any supervisor requests to revoke access to Worldlink will be sent to the Security Administrator. - The Security Administrator will process according to the Changing or Inactivating User Access Accounts section of this procedure.
	Autostore	- Complete an Autostore System Annual Security Access Review Form, Attachment B, for all active access accounts for each supervisor's review and approval. Note: Attachment B is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. - Submit the form to each supervisor directing that it be reviewed to determine all accounts listed are valid. Request that supervision sign, date, and return the forms indicating the review findings. Note: If invalid access accounts are found, process according to the Changing or Inactivating User Access Accounts section of this procedure. - Submit the signed and dated forms to NALO Quality Assurance for review. Request that QA signs, dates, and return the forms indicating the review findings.
	AS/RS	- Complete an AS/RS System Annual Security Access Review Form, Attachment C, for all active access accounts for each supervisor's review and approval. Note: Attachment C is not an example. This form is a controlled part of this procedure and must be used as written or revised through procedure revision. Print this attachment from the document management system each time it is needed to ensure the correct version is used. - Submit the form to each supervisor directing that it be reviewed to determine all accounts listed are valid. Request that supervision sign, date, and return the forms indicating the review findings. Note: If invalid access accounts are found, process according to the Changing or Inactivating User Access Accounts section of this procedure. - Submit the signed and dated forms to NALO Quality Assurance for review. Request that QA signs, dates, and return the forms indicating the review findings.
