

STANDARD OPERATING PROCEDURE

ELI LILLY AND COMPANY

North American Logistics Operations

Assignment, Use and Review of Logbooks in NALO

USD-SOP-Logbooks in NALO-178

PURPOSE	To describe the general requirements for the assignment, use and review of logbooks used to track forms associated with procedures used in North American Logistics Operations (NALO) to ensure the data integrity of the forms documenting GMP information. This includes GMP On-the-Job Training (OJT) documents. The process of using barcodes and logbooks to track forms is used as a business continuity plan in the event Controlled Print or QualityDocs is not functioning in such a way as to provide forms with unique identifiers.
AREAS INVOLVED	NALO Operations, NALO Tech@Lilly, NALO Engineering and Maintenance, North American Shared Service Center (NASSC-CS), Transportation and Logistics, NALO Quality Assurance and support areas
REFERENCES	USD-SOP-Deviation Mgmt-001 DO23676_LL: NALO Good Documentation Practices Leader Led Training GQS105, Data Integrity and Good Documentation Practices Global Records Retention Schedule
APPROVALS	Approval of this procedure requires the signature of: Management, NALO Operations Management, NALO Quality Assurance
REASON FOR REVISIONS	All revisions are marked with an (*): To remove Fresno. • Rationale: CC40755631

INTRODUCTION

All GMP forms and OJTs not printed through the Controlled Print feature of QualityDocs must have a barcode issued before use.

The following attachments for this procedure reside in the electronic document management system:

Attachment B, Master Logbook
Attachment C, Form Tracking Data Logbook
Attachment E, Controlled GMP Forms

DEFINITIONS

Logbook - A book of logsheets and/or logsheets and forms bound by Lilly Document Services or a third-party printer that is used for the tracking of forms issued from various NALO procedures.

Master Logbook - A bound logbook containing the information detailed in Attachment B. The Master Logbook is completed by NALO QA and filed according to the Global Records Retention Schedule in the NALO GMP Library. The Master Logbook does not require a quarterly QA review.

Form - Documentation that is used to record execution of activities and/or collection of data. The form must be controlled if it documents the collection of raw data from the execution of a GMP activity or directly indicates that a GMP activity occurred or if the form documents a decision regarding product quality (e.g., approving or rejecting product.)

Control - Means the following items are implemented for the forms: Unique identification, Controlled access, Secure storage, Reconciliation process, Prevention of reproduction.

Issuance - Means the form or logbook has been printed and/or checked by QA (or designee), has been recorded in the appropriate logbook, and is ready for use.

QA (or designee) – This can be a member of Operations who has been trained by QA for the assignment, use and review of logbooks in NALO.

**USE,
MAINTENANCE,
AND
DOCUMENTATION
REQUIREMENTS**

Logbooks are owned and maintained by QA (or designee) and the areas that use them.

Owners/users are responsible for notifying QA of all new logbooks that need to be created. QA uses the Master Logbook when creating new logbooks. *The Master Logbook is filed in the Enfield or Plainfield GMP Library as appropriate.

Logbooks are used as follows:

Step	Action
1	Write legibly in permanent black or blue ink only.
2	All entries must be in chronological order and pages must be numbered.
3	Use Good Documentation practices to complete entries in logbooks. Refer to DO23676_LL: NALO Good Documentation Practices Leader Led Training.
4	Use all logbooks until they are retired, full, become damaged, or are revised. Subsequently, a new logbook is issued, and the used/damaged/revised logbook is stored in the NALO GMP Library. Note: Give full/damaged/revised logbooks to QA.

**QA MAINTAINS
MASTER
LOGBOOK**

NALO Quality Assurance completes the Master Logbook each time a new logbook is established. The Master Logbook contains the following information (see Attachment B, Master Logbook Data):

1. Logbook number (see QA Assigns Logbook Number section below).
 2. Date the logbook is assigned/initials
 3. Area of Use
 4. Logbook Description/Type
 5. Barcode of logbook
 6. Date the logbook is retired/initials
-

**QA ASSIGNS
LOGBOOK
NUMBERS**

QA (or designee) assigns logbook numbers in the following format:
SSS-YYYY-DDD-XXX

Where:

*SSS = Site of Issuance (PDC, EDC)

YYYY = Year of issuance

DDD = Julian date of issuance

XXX = Sequential number of logbooks issued on a day

Example Logbook Number: PDC-2020-234-001

**QA RECORDS
INFORMATION IN
THE FRONT OF
EACH LOGBOOK**

QA (or designee) records the following information and places it at the front of each logbook:

1. Logbook number
 2. Date assigned
 3. Area of Use
 4. Logbook Description
 5. Barcode
 6. Date logbook retired/initials
-

**QA ISSUES
LOGBOOKS**

QA (or designee) issues logbooks to areas by:

1. Recording issuance in Master Logbook.
 2. Applying barcode on issued logbook and Master Logbook.
 3. Initialing/Dating issuance in Master Logbook.
 4. Giving logbook to area to execute.
-

**ISSUANCE
AND USE OF
FORMS**

QA and the areas executing forms follow the steps below.

All documents issued a barcode must be returned to QA (or designee) to be reconciled and not discarded.

For GMP OJTs and Forms Listed in Attachment E, Controlled GMP Forms

Step	Action
1	Print the needed form(s) and take to QA (or designee) for issuance, or request form from QA (or designee).
2	QA (or designee) issues the form by: a. Verifying that the form was printed on the current day and/or is the current effective version b. Verifying that all pages are present and numbered appropriately. c. Entering form name in the appropriate logbook. d. Applying barcode on first page of form and in appropriate line of logbook. e. If form is more than one sheet of paper, write barcode number and initial/date on each additional page that captures GMP data. f. Initialing/dating issuance in logbook. g. Giving the form to area to execute.
3	When form is complete, area gives the form to QA (or designee) for reconciliation.
4	QA (or designee) reconciles completed forms by: a. Ensuring all pages of the form are present and complete. b. Completing the Form Reconciled Initial/Date column of Attachment C, Form Tracking Data Logbook in the appropriate logbook.
5	Form is filed per its corresponding procedure or OJT.

**REVIEW OF
LOGBOOKS**

QA follows the steps below to review logbooks containing GMP information. These reviews ensure that the content of the logbooks is complete, accurate and comply with Good Documentation practices.

Step	Action
1	Review logbooks at least quarterly. Note: Document and investigate any issues found during the logbook audit that could potentially impact product quality per USD-SOP-Deviation Mgmt-001.
2	Document "QA review" on the last completed form reviewed, including the date and signature or initials. Note: The logbook may continue to be used until it is retired, full, damaged or revised. Note: Each quarterly signature signifies that the logbook was reviewed from the previous signature through the current signature.

**RETIRING
LOGBOOKS**

Logbooks are retired when a logbook user turns in a completed logbook, a damaged logbook, or when it is determined during the revision process that any active logbook must be replaced.

Logbook owner/users follow the steps below when retiring a logbook.

Step	Action
1	Ensure each page of the logbook is complete before sending the logbook for retirement. This includes: • Adding "N/A" and "End of Data" (or equivalent) where appropriate • Ensuring all necessary signatures are present, and • Handling all omissions appropriately.
2	Notify QA when a completed, damaged, or replaced logbook needs to be retired.

**RECORD
RETENTION**

Retain the following according to the Global Records Retention Schedule in the NALO GMP Library:

- Logbook
- Master Logbook
- Forms Not Bound in Logbooks
