

STANDARD OPERATING PROCEDURE
ELI LILLY AND COMPANY
North American Logistics Operations

Use of the TW1000 Activity Planning Module in NALO

USD-SOP-Activity Planning TW1000-170

PURPOSE	To describe the process for using the Activity Planning module in TrackWise1000.
----------------	--

AREAS INVOLVED	North American Logistics Operations (NALO), NALO Quality Assurance, NALO Health, Safety and Environmental, and NALO support areas
-----------------------	---

APPROVALS	Approval of this procedure requires the signatures of: Management, NALO Operations Representative, Health, Safety, and Environmental Management, NALO Quality Assurance
------------------	--

REFERENCES	Global Records Retention Schedule Global CAPA site for TrackWise guidance and resources: Trackwise 1000 - Home (lilly.com)
-------------------	--

REASONS FOR REVISION	No revisions were necessary at periodic review.
-----------------------------	---

DEFINITIONS

Activity Planning Record	A Trackwise electronic record such as Work Plan, Work Item, Work Task, or Work Action that is housed in the Activity Planning module of TrackWise.
Amendment Request	Review Owner initiated request to modify an approved record.
Effectiveness Check	A field in a Work Action child record used to document the outcome and/or impact of the action plan. It is an assessment of how well it addressed the inspection finding(s).
Work Plan Record	A TrackWise electronic parent record identified by a unique number, utilized to group related Work Items together (e.g., 2022 Standard Gap Assessments).
Work Item Record	A TrackWise electronic parent or child record identified by a unique number, utilized to capture the completion of an activity (e.g., assess the GQS203 revisions to determine if there is any impact to NALO and any actions required to close gaps).
Work Action Record	A TrackWise record identified by a unique number, utilized to track the implementation of actions related to or resulting from a work item. (e.g., Revise procedure ABC to close the gap identified during the GQS203 Revision 5 gap assessment).

INTRODUCTION The Activity Planning module within TrackWise is utilized to ensure that Action Items from various sources are completed by the agreed upon due date. See Attachment A, TW1000 Activity Planning Module Workflow for detailed workflow.

Work Plans, Work Items, Work Actions, and Work Tasks within the scope of Activity Planning can be developed from GMP approved reviews, which include but may not be limited to:

- Annual Product Reviews
- Local procedures
- Management Reviews
- Quality Plan
- Risk Assessments
- Periodic Supplier Performance Reviews
- Pest and Temperature Monitoring
- Self-Inspections
- Observations from Inspection/Audits
- Issues from self-inspections
- Inspections
- Reviews of facilities, utilities, equipment, and computer systems
- Gap Assessment Actions
- Recurring Actions Required by Procedure
- Actions due to regulatory or customer commitments
- Outstanding Items from Qualification or Validation Reports

Effectiveness Checks are only required for Work Items and Work Actions resulting from inspections/audits. They are optional for other records.

Cancellation/Abandonment of Activity Planning records can be performed by quality on records that are in an open state or in progress depending on the workflow. Justification for the abandonment is provided within the Execution Summary field.

All Quality-related Work Actions must be verified by a Quality Verifier. HSE Work Actions must be verified by an HSE Verifier.

All Effectiveness Checks must be executed by a Quality or HSE Verifier for inspection/audit CAPA. The Record Owner must be notified on any Effectiveness Check deemed ineffective.

RESPONSIBILITIES

This procedure is administered/managed, at a minimum, by the following individuals:

- Work Item, Work Action or Work Task Owner
 - Executes and documents the completion of assigned Work Item, Work Action, and Work Tasks.
 - Requests Due Date Changes.
 - Activity Planning Approver
 - Reviews and approves Activity Planning records and due date changes.
 - Ensures that Activity Planning records fall within the scope of this procedure.
 - Ensures that actions stemming from approved GMP reviews have been entered accurately into the Work Action, Work Task, or Work Item records.
 - Quality approval is required for all quality records. HSE approves HSE records
 - Activity Planning Owner
 - Creates Work Plan, Work Action, Work Tasks, or Work Items.
 - Creates Effectiveness Check to evaluate Action plan outcome for all inspection related CAPA.
 - Submits the Activity Planning record(s) for approval.
 - When applicable, originate due date changes.
 - Where applicable, abandons Activity Planning records and provides justification.
 - Reviews completed Work Task records.
 - If an Effectiveness Check is deemed ineffective, communicates the results and path forward to the Quality or HSE Lead Team.
 - Verifier/Evaluator
 - QA or HSE representative or higher
 - Verifies completed Work Action records.
 - Conducts evaluation of Effectiveness Checks for all inspection related CAPA
 - Notifies Record Owner upon ineffectiveness outcome of an Effectiveness Check and assists with resolution.
-

**ACTIVITY
PLANNING
RECORDS**

Step	Action
1	The Activity Owner determines the type of Record to be created in the Activity Planning module of TrackWise. The type of record used is based on the specific information that needs to be completed. See the Creation of Work Plan Records section for the types of Work Plans and Work Items.
2	Activity Planning records can have CAPAs associated with them.
3	When applicable, the Activity Owner indicates in the Work Item record that an effectiveness Check record is required. Effectiveness Checks are assigned to a Verifier.
4	Activity Planning records can have both Area and Quality, or HSE, approvals depending on the record type.
5	Record owners ensure documentation is complete within the record. Note: If Quality is the only functional area approving the Work Item, their name should be selected under Organizational Unit Approver, as Organizational Unit Approver is a required field for TW1000.
6	Activity Records can be used to create a schedule of periodic required related activities. Note: If the Work Plan is an annual Plan, the last Work Item in the plan should be to create and approve next year's Work Plan.

**CREATION OF
WORK PLAN
RECORDS**

RECORDS

Step	Action															
1	Work Plan records are parent records and must have Work Items associated with them. See Attachment A, TW1000 Activity Planning Module Workflow, Figure 1.															
2	There are four (4) categories of Work Plans: Table 1: TW1000 Work Plan Categories <table><tr><th>Work Plan Category</th><th>Description</th><th>Pre-Execution Approvers^</th></tr><tr><td>Calendar</td><td>Used to create items due by certain dates (Quality Plan, Annual Product Review Schedule, Management Review)</td><td>See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality and Org unit approval at a minimum.</td></tr><tr><td>Impact Assessment</td><td>Used to create items to assess changes in global standards or regulations</td><td>See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality unit approval at a minimum.</td></tr><tr><td>Periodic Review</td><td>Used to create items that will be used to document the completion of periodic reviews (e.g., SOPs, job descriptions etc.).</td><td>See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality unit approval at a minimum.</td></tr><tr><td>Site Self-Assessment/Inspection</td><td>Used to create a site self-inspection schedule or track actions resulting from internal and external inspections.</td><td>Site Quality Leader</td></tr></table> ^Functional Area could be Quality Assurance.	Work Plan Category	Description	Pre-Execution Approvers^	Calendar	Used to create items due by certain dates (Quality Plan, Annual Product Review Schedule, Management Review)	See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality and Org unit approval at a minimum.	Impact Assessment	Used to create items to assess changes in global standards or regulations	See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality unit approval at a minimum.	Periodic Review	Used to create items that will be used to document the completion of periodic reviews (e.g., SOPs, job descriptions etc.).	See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality unit approval at a minimum.	Site Self-Assessment/Inspection	Used to create a site self-inspection schedule or track actions resulting from internal and external inspections.	Site Quality Leader
Work Plan Category	Description	Pre-Execution Approvers^														
Calendar	Used to create items due by certain dates (Quality Plan, Annual Product Review Schedule, Management Review)	See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality and Org unit approval at a minimum.														
Impact Assessment	Used to create items to assess changes in global standards or regulations	See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality unit approval at a minimum.														
Periodic Review	Used to create items that will be used to document the completion of periodic reviews (e.g., SOPs, job descriptions etc.).	See corresponding procedure for minimum approvers. If the activity is not governed by a corresponding procedure OR the procedure does not list approvers, the approvers will be Quality unit approval at a minimum.														
Site Self-Assessment/Inspection	Used to create a site self-inspection schedule or track actions resulting from internal and external inspections.	Site Quality Leader														
3	Work Plan records are not assigned an owner. Note: At least one Work Item must be associated with a Work Plan upon creation. Work Items are created using the Work Item Grid in the Work Plan record.															
4	Work Plans are approved and closed upon approval in TrackWise.															
5	Additional Work Items can be added to the Work Plan Record after it is closed.															

**WORK ITEM
RECORDS**

Step	Action																				
1	Work Item records are parent records and can be created independently or as part of a Work Plan record. See Attachment A, TW1000 Activity Planning Module Workflow, Figure 1.																				
2	There are eleven (11) work item categories. NALO utilizes the work item categories listed in Table 2: Table 2: TW1000 Work Item Categories <table><tr><th>Work Item Category</th><th>Description</th><th>Pre- Execution Approver(s)³</th><th>Post- Execution Approver(s)⁴</th></tr><tr><td>Access Roster Review</td><td>A review of the documents listing accounts and access privileges associated with those accounts</td><td>Functional Area Representative or above</td><td>QA Representative or above</td></tr><tr><td>Annual Product Review</td><td>Used to document the completion of BLA and NDA distribution data reports</td><td>N/A¹</td><td>As defined by local applicable procedures</td></tr><tr><td>Asset Qualification Monitoring</td><td>Used to document the completion of AQMS activities</td><td>N/A¹</td><td>QA Representative or above and functional area management</td></tr><tr><td>Calendar Item</td><td>Used to document a non-recurring activity that must be completed by a certain date (e.g., Q Plan Item).</td><td>Functional Area Representative or above</td><td>QA Representative or above</td></tr></table>	Work Item Category	Description	Pre- Execution Approver(s) ³	Post- Execution Approver(s) ⁴	Access Roster Review	A review of the documents listing accounts and access privileges associated with those accounts	Functional Area Representative or above	QA Representative or above	Annual Product Review	Used to document the completion of BLA and NDA distribution data reports	N/A ¹	As defined by local applicable procedures	Asset Qualification Monitoring	Used to document the completion of AQMS activities	N/A ¹	QA Representative or above and functional area management	Calendar Item	Used to document a non-recurring activity that must be completed by a certain date (e.g., Q Plan Item).	Functional Area Representative or above	QA Representative or above
Work Item Category	Description	Pre- Execution Approver(s) ³	Post- Execution Approver(s) ⁴																		
Access Roster Review	A review of the documents listing accounts and access privileges associated with those accounts	Functional Area Representative or above	QA Representative or above																		
Annual Product Review	Used to document the completion of BLA and NDA distribution data reports	N/A ¹	As defined by local applicable procedures																		
Asset Qualification Monitoring	Used to document the completion of AQMS activities	N/A ¹	QA Representative or above and functional area management																		
Calendar Item	Used to document a non-recurring activity that must be completed by a certain date (e.g., Q Plan Item).	Functional Area Representative or above	QA Representative or above

Step	Action																								
2	Table 2: TW1000 Work Item Categories <table><tr><th>Work Item Category</th><th>Description</th><th>Pre- Execution Approver(s)³</th><th>Post- Execution Approver(s)</th></tr><tr><td>Periodic Review</td><td>Used to document the completion of a periodic review activity (e.g., Management Review)</td><td>N/A¹</td><td>QA Representative or above</td></tr><tr><td>Process Hazard Review</td><td>Not used by NALO</td><td>N/A</td><td>N/A</td></tr><tr><td>Process Monitoring</td><td>Not used by NALO</td><td>N/A</td><td>N/A</td></tr><tr><td>Recurring Calendar Item</td><td>Used to document the completion of a recurring item required by local procedure (e.g., Monthly Housekeeping)</td><td>Functional Area Representative or above</td><td>QA Representative or above</td></tr><tr><td>Site Self-Assessment/ Inspection</td><td>Used to document the completion of a SSI and internal/external audit responses</td><td>N/A¹</td><td>QA Representative or above</td></tr></table> ¹ Will be pre-approved as part of Work Plan on an annual basis. ² If not already approved as part of a Work Plan. ³ Functional Area could be Quality Assurance. Note: The org unit must be filled in and if it is Q only, put the Q name in that field ⁴ Approvals are based on the governing document when activity planning is used to document the review/action. All others are defaulted to this procedure's approval process (e.g. NALO Gap Assessments are approved in Qdocs by the Quality Associate Director therefore the associated work item may be approved post execution by a QA Representative or above). Note: If Quality is the only approver, then Quality would be the only Abandonment Org Unit Approver. Note: The Work Item Title field is limited to 120 characters and is not editable after approval. The system will not stop input at this max number, but after approval the Title will be truncated. It is critical that a clear Title is approved. Note: The Work Item Description field is editable after approval and does not have a character limit. Use this field just for clarification.	Work Item Category	Description	Pre- Execution Approver(s) ³	Post- Execution Approver(s)	Periodic Review	Used to document the completion of a periodic review activity (e.g., Management Review)	N/A ¹	QA Representative or above	Process Hazard Review	Not used by NALO	N/A	N/A	Process Monitoring	Not used by NALO	N/A	N/A	Recurring Calendar Item	Used to document the completion of a recurring item required by local procedure (e.g., Monthly Housekeeping)	Functional Area Representative or above	QA Representative or above	Site Self-Assessment/ Inspection	Used to document the completion of a SSI and internal/external audit responses	N/A ¹	QA Representative or above
Work Item Category	Description	Pre- Execution Approver(s) ³	Post- Execution Approver(s)																						
Periodic Review	Used to document the completion of a periodic review activity (e.g., Management Review)	N/A ¹	QA Representative or above																						
Process Hazard Review	Not used by NALO	N/A	N/A																						
Process Monitoring	Not used by NALO	N/A	N/A																						
Recurring Calendar Item	Used to document the completion of a recurring item required by local procedure (e.g., Monthly Housekeeping)	Functional Area Representative or above	QA Representative or above																						
Site Self-Assessment/ Inspection	Used to document the completion of a SSI and internal/external audit responses	N/A ¹	QA Representative or above																						
3	Work Item records are assigned an owner in TrackWise.																								
4	Work Items are approved prior to execution and after execution.																								
5	Work Items can be abandoned after creation of the records with the appropriate justification and approved by original approvers of the Work Plan/Item and a Quality Assurance representative or higher.																								
6	Due Date changes can occur with the appropriate justification and approved by a Quality Assurance representative or higher. Due Date changes for Work Items associated with APRs, Quality Plan, Inspections, Audits, Management Reviews, must be approved by Associated Work Plan approvers.																								
7	Additional records such as Work Task and Work Actions can be created as part of this record.																								
8	When applicable, Effectiveness Checks can be assigned as part of this record. Site Self-Assessment/Inspection work items require an Effectiveness Check.																								

**WORK TASK
RECORDS**

Step	Action
1	The Work Task is an optional record that may be used to contact subject matter experts to complete a portion of the work needed to complete the activity documented in the Work Item. See Attachment A, TW1000 Activity Planning Module Workflow, Figure 2.
2	The Work Task record is created using the work task grid in TrackWise. Multiple records can be created at one time or on an individual basis.
3	Work Task records are assigned an owner in TrackWise.
4	Due dates can be pushed out as long as they remain within the approved due date of the parent Work Item record. Due dates that exceed this date require justification and approval.
5	Work Task records can be cancelled after creation of the records with no approval.
6	Work Task records are approved and closed with the post-approval of the Work Item.

**WORK
ACTIONS
RECORDS**

Step	Action
1	The Work Action record is a child record of the Work Item record. It is used to close identified gaps or actions for continuous improvement. Work Action records are executed after the post-approval of the Work Item. See Attachment A, TW1000 Activity Planning Module Workflow, Figure 2.
2	Work Action records are assigned an owner in TrackWise.
3	Work Action records can be abandoned after post-approval of the Work Item with the appropriate justification and approved by a Quality Assurance representative or higher.
4	Due Date changes can occur with appropriate justification and approval by Quality Assurance representative or higher. Note: When applicable, an Effectiveness Check can be assigned as part of the parent record.

**VERIFICATION
OF WORK
ACTIONS**

Step	Action
1	Action verification and record closure shall be completed using Attachment B, TW1000 Activity Planning Tool. An individual may not verify a Work Action they have completed/performed.
2	Verification of all actions must be completed by a Verifier.

**EFFECTIVENESS
CHECK
EVALUATIONS**

Step	Action
1	Effectiveness Checks must be completed by a Verifier.
2	The Effectiveness Check Target Due Date is set once all related actions are completed. Sufficient time should be included to acquire enough data to support the Action Plan's success. Contact the Activity Owner if needed. Note: An Effectiveness Check should be used for actions related to inspections and/or audit findings (internal or external) when applicable.
