REASONS FOR REVISION

Refer to the following version of this procedure to determine when/why star symbols (★) were originally added:

https://lilly-qualitydocs.veevavault.com/ui/#doc_info/1735593/11/0

All revisions are marked with an (*):

1. To add information regarding Collaborative Workflows for procedures/attachments/training documents to the Introduction. This includes adding reference to the QualityDocs Performance Support Site.
 - Rationale: To reflect local business process.
 2. To add that contents from GQS/LQS documents or any other governing documents should not be copied/pasted directly into local procedures to the Introduction.
 - Rationale: To ensure continuous alignment with effective governing documents.
 3. To update the Forms definition.
 - Rationale: TR40634669.
 4. To update the Note(s) to File definition. This includes adding QualityDocs User Guide: Manage Document Change Log to the References section.
 - Rationale: To include Document Change Log information.
 5. To add to the Required Elements for Procedures/Reasons for Revision section that a statement within the Reasons for Revision is added and remains in the Reasons for Revision section for procedures containing star symbols ★.
 - Rationale: To ensure traceability and compliance with those changes.
 6. To add NALO Computer Systems Procedures to the Minimum Reviewers and Approvers for Procedures and Attachments section. This includes adding LQP-302-25 in the References section.
 - Rationale: Per LQP-302-25, Risk Evaluation and Responsibilities for Computer Systems.
 7. To remove “^Note: Quality Assurance provides the L&D Document Controller with appropriate effective dates for revised GMP forms (i.e., Attachments to SOPs) bound in logbooks to ensure they are properly maintained” from the Minimum Reviewers and Approvers for Procedures and Attachments section.
 - Rationale: NALO no longer has GMP forms (i.e., Attachments to SOPs) bound in logbooks.
 8. To add recommended guidance for procedure revisions to the Submitting Documents for Revision section.
 - Rationale: TR#40655343. To allow sufficient time for document control, reviews, approvals, and training activities.
 9. To add a Note regarding Procedure/Attachment/Training Requests to the Submitting Documents for Revision section.
 - Rationale: For clarification.
 10. To add “for formal review and approval” to the last sentence in the Introduction of the Submitting Documents for Revision section.
 - Rationale: For clarification.
 11. To update the introduction of the Retirement Process section.
 - Rationale: To remove unnecessary content.
 12. To rearrange the bullet points in Step 2 of the Retirement Process section.
 - Rationale: For clarification.
-

INTRODUCTION NALO Reviewers, Approvers and L&D Document Controller use this procedure along with the following training to process NALO procedures, attachments, and training documents in QualityDocs.

Follow this procedure if instructions do not align with the training listed below. Contact NALO L&D for clarification when needed.

- IT_GBL: QualityDocs Workflow Participant Training, Item# 9290122
- IT_GBL: QualityDocs Document Controller and Form Controller Training, Item# 9290123

*Collaborative workflows for NALO procedures and their attachments and training documents in QualityDocs may be started by any NALO Document or Form Controller, however, L&D must be informed of final versions of documents on collaborative workflows to be routed for formal review and approval in QualityDocs as described in this procedure. Reference QualityDocs Performance Support Site for information regarding Collaborative Authoring.

*To ensure continuous alignment, only references to GQS/LQS or any other governing documents should be mentioned within NALO procedures (i.e., contents from governing documents should not be copied/pasted directly into NALO procedures).

TERMS AND DEFINITIONS

The following terms and definitions are used within this procedure.

Term	Definition
Approver	Performs “Approve” or “Reject” activity for documents involving areas for which they have responsibility. Approvers are responsible for ensuring that the document has been reviewed by the appropriate subject matter experts and agree that it adequately addresses the intended purpose and scope of the document.
Annotations	Comments and markings made within the document viewer in QualityDocs to provide feedback on the document during a Review workflow.
Attachments (for Procedures)	Support the procedure’s content and can reside within or outside of the procedure. They can also be “Forms”. Use only effective Attachments at the time they are needed (i.e., verify Status is “Effective” in QualityDocs). Training is not required on Attachments.
Comments	Comments made outside the document viewer to provide feedback on the document during a Review workflow.
L&D Document Controller	A member of the NALO L&D group who has permissions of a Document/Form Creator and manages documents (including those with an Executed Electronic Form document type) through workflows (workflow owner) in QualityDocs.
*Forms	Documentation that is used to record execution of activities and/or collection of data. The form must be controlled if it documents the collection of raw data from the execution of a GMP activity or directly indicates that a GMP activity occurred or if the form documents a decision regarding product quality (e.g., approving or rejecting product). Forms needing to be controlled and are intended to be printed must use the Document Type of Master Executable Form. Forms for NALO procedures are called Attachments.
*Document Change Log [Note(s) to File]	Used to capture changes for future revisions of procedures, procedure attachments, and training documents. Contact the L&D Document Controller to request a Document Change Log in QualityDocs. For information on Document Change Logs, see the QualityDocs Performance Support Site - Document Change Log .
QualityDocs	A Veeva-vault, cloud-based application approved to be implemented company-wide as the controlled document management system.
Reviewer	Reviewers are the subject matter experts assigned to represent their area regarding the review of Procedures, Attachments, and Training. During the review of a draft document, it is the responsibility of each Reviewer to ensure that comments via Annotations or Comments are made to the drafts so that the resultant document accurately, completely and without possible misinterpretation describes the steps to accomplish a task so that the operation is performed correctly, consistently, and in accordance with established standards. See also the Reviewers: Reviewing Process section.

**PERIODIC
REVIEW
FREQUENCY**

The table below lists periodic review periods for procedures and their associated attachments, and training documents. Periodic review dates normally reset whenever any revised documents are made effective.

Document Type	Periodic Review Period
SOPs	3 years
Attachments to SOPs	0 years
Non-GMP SOPs	3 years
Training Forms	0 years
Training Material	3 years

**REQUIRED
ELEMENTS FOR
PROCEDURES**

The following elements are required to be within the procedure document.

Required Element	Location of Element	Description
SOP Heading	Body	Centered on first page of SOP: STANDARD OPERATING PROCEDURE ELI LILLY AND COMPANY <OWNING AREA OF PROCEDURE> Where this reflects the owning area, e.g., North American Logistics Operations, Health and Safety Procedure.
Title	Body	The title of the procedure.
Name (formerly known as Procedure number)	Body	For documents migrated from Regulus into QualityDocs, the document name remains the same with the unique number at the end of the procedure number (i.e., "-001", "-002", "-003", etc.). The numbers at the end of the document name are not version numbers but rather the procedure identifiers assigned by Regulus. For new procedures in QualityDocs, the naming convention remains the same (i.e., USD-SOP-Name of the Document), but without the number "-###" at the end.
Superseded procedure number(s)	Body	For superseded procedures, list the SOP number(s), if applicable. For example, NovaManage Procedure 001-001234. Note: This section should always contain the prior NovaManage number and/or Regulus number, if applicable, as it is needed during site audits.
Purpose	Body	A short description of the objective of the procedure.
Areas Involved	Body	The Areas Involved refers to those areas which have tasks and/or responsibilities specified within the procedure. The titles of these areas must be specific enough to determine to whom the procedure applies. Examples include: - Site (e.g., NALO Operations), - Functional unit (e.g., NALO Quality Assurance, NALO Engineering and Maintenance) Training on the procedure is required for the Areas Involved.

Continued on next page

**REQUIRED
ELEMENTS FOR
PROCEDURES,
CONTINUED**

Required Element	Location of Element	Description
Areas Affected (if applicable)	Body	Areas impacted/affected by the outcome of a procedure, areas responsible for the next stage of a process following execution of a procedure may also be listed, but separately from Areas Involved. Training on the procedure is optional for Areas Affected. Areas Affected are not required to approve the procedure.
Approvals	Body	The Approvals section must include a list of Approvers (by position title) required to approve the procedure.
References	Body	The References section must include a list of all documents referred to in the procedural description section of the procedure. This section can also include governing documents (i.e., GQS/LQS, etc.). For each procedure referenced in the body of the document, only the identifier needs to be included (i.e., USD-SOP-Site Quality Plans-001), as the qualifier portion of this identifier is an abbreviated version of the title of the procedure.
Reasons for Revision (An "" denotes changes.)	Body	For revisions to an existing procedure, the Reasons for Revision must be listed within the procedure and include clear, complete, and accurate statements of what changed and why, including justification (i.e., rationale). An asterisk (*) next to changes made within the body of the document depicts changes made within the document. Asterisks are not needed if document is "revised in its entirety". For procedures containing ★ symbols, a statement within the Reasons for Revision is added and remains in the section.
Procedural Description	Body	The main body of the procedure. Note: The term 'Procedural Description' is not required to be used to head the procedure content.
Page number	Footer	The page number and total number of pages are listed on bottom of each page. Page numbers are listed in the format of "Page X of Y" <u>Example:</u> Page 4 of 6
Training Course Number and Item Number with Revision Number	Footer	The applicable training course number and item/revision number. Note: The revision number listed in the footer is the revision number of the item.

**MINIMUM
 REVIEWERS AND
 APPROVERS FOR
 PROCEDURES AND
 ATTACHMENTS**

The following table reflects the minimum requirements for reviewers and approvers for procedures and attachments. See USD-SOP-NALO Training Proc-001 for review and approval requirements for training documents.

For	Reviewers	Approvers
GMP Procedures	- One (1) person from each functional area (i.e., covering each Area Involved) - A QA Reviewer.	- Management of each functional area, or the least common functional Management of the Areas Involved. - Management, NALO QA.
*NALO Computer Systems Procedures and Attachments	- One (1) person from each functional area (i.e., covering each Area Involved) - NALO Computer Systems Quality Assurance Representative (CSQA).	- Management of each functional area, or the least common functional Management of the Areas Involved. - NALO Computer Systems Quality Assurance Representative (CSQA) - Management, NALO QA.
GMP Attachment(s)	One (1) person from each functional area (i.e., covering each Area Involved).	- Management of each functional area, or the least common functional Management of the Area that uses the Attachment(s). - NALO QA Representative.
Non-GMP Procedures that are not Health, Safety, Environmental	One (1) person from each functional area (i.e., covering each Area Involved).	Management of each functional area, or the least common functional Management of the Areas Involved.
Health, Safety, Environmental Procedures and Attachments	- One (1) person from each functional area (i.e., covering each Area Involved) - A Safety Representative.	- Management of each functional area, or the least common functional Management of the Areas Involved. - A Safety Representative.

**ABBREVIATED
APPROVAL
CRITERIA AND
APPROPRIATE
USE**

If changes to revised procedures fall into the Abbreviated Approval Criteria, no Review step is required.

When using Abbreviated Approval, the L&D Document Controller documents a statement in the Reasons for Revision that indicates the changes meet the Abbreviated Approval criteria. For example, "All reasons for revision meet the Abbreviated Approval Criteria."

The following criteria allow for abbreviated approval:

- Changing format/style with no changes in the content or sequence of the instructions
 - Adding/changing/removing a contact person
 - Changing subject/title and/or purpose information to more accurately reflect content
 - Adding notes, clarifying statements or making editorial changes which enhance instructions without changing the intent of the instructions or the manner in which the instructions are performed
 - Adding/removing definitions
- Note:** Changing a definition does not meet Abbreviated Approval Criteria.
- Correcting obvious factual errors (e.g., typographical errors, referenced procedure number or title change, item code that does not exist)
 - Changing department and/or division names and/or numbers provided the function of the department/division remains the same.
-

SUBMITTING DOCUMENTS FOR REVISION

Prior to submitting a document for revision or retirement, users determine if any other Procedures, Attachments, or Training documents need to be revised or retired and submit all changes to the L&D Document Controller at the same time. Revised documents are written in active voice and with correct spelling and grammar. Submitters and L&D Document Controllers follow the table below.

*Submitters should note the following recommended processing times for procedures and training documents:

- Document control = 3 business days minimum
- Reviews = 5 business days minimum
- Approvals = 5 business days minimum
- Training = 13 business days minimum before effective date if re-training is required (includes 3 business days processing in the Learning Management System and 10 business days for learners to complete training)

***Note:** Procedure/Attachment/Training Requests are used for L&D information only and not used for GMP purposes.

*Only NALO Learning & Development (L&D) Document Controllers may route procedures, attachment to procedures, and training documents for formal review and approval in QualityDocs.

If	Then
New procedures/attachments and/or training documents,	• For each document, Submitter enters a Procedure/Attachment/Training Request on the NALO L&D Collaboration site. All information must be in the request • Submitter sends draft document(s) electronically to L&D Document Controller • L&D Document Controller adds appropriate training information to the draft document(s) and follows the L&D: Preparing Procedures and Training for Review and/or the L&D: Preparing Procedures and Training for Approval section of this procedure, then routes updated document(s) in QualityDocs accordingly.
Revised procedures/attachments and/or training documents,	• For each document, Submitter obtains a copy of the document(s) for revision and edits them using Microsoft Word, ensuring the Track Changes tool is "on" • When finished editing, Submitter enters a Procedure/Attachment/Training Request on the NALO L&D Collaboration site. All information must be in the request • Submitter sends draft document(s) electronically to L&D Document Controller when edits are complete • L&D Document Controller adds appropriate training information to the draft document(s) and follows the L&D: Preparing Procedures and Training for Review and/or the L&D: Preparing Procedures and Training for Approval section of this procedure, then routes updated document(s) in QualityDocs accordingly.
Retiring procedures/attachments and/or training documents,	• For each document, Submitter enters a Procedure/Attachment/Training Request on the NALO L&D Collaboration site. All information must be in the request • L&D Document Controller routes document(s) according to the Retiring section of this procedure.

REVIEWING

GUIDING DOCUMENTS FOR REVIEW CONSIDERATION

Procedures and training all hold the same importance, but each has a different scope of affected areas. During the Review step, the following publications should be accessed to determine whether the procedure/training under consideration is in agreement with applicable guiding documents. The hierarchy of documentation for SOP and training review begins with the Lilly Quality Standards with accompanying Lilly Quality Practices, then the Global Quality Standards (GQS) which are derived from GMP laws and regulations for all global markets. A GQS has a GQS Reference Document that aligns these various global laws and regulations with the GQS. Some GQS documents have Common Quality Practices (CQP) document(s) directing how to implement the GQS. CQP documents must be followed. Some GQS documents have Global Resource Documents which can be utilized as templates for implementation of the GQS requirements.

Document	Purpose
Lilly Quality Standards (LQS)	Standards to achieve fundamental quality management objectives and pharmaceutical quality objectives across the enterprise.
Lilly Quality Practices (LQP)	Direct how to implement the LQs.
Global Quality Standards (GQS)	Global policy derived from global regulatory agencies and associated guidelines and regulations including FDA, EMEA, WHO, CFR, ICH, and Lilly registrations.
References to Standard Requirements	Links to the regulatory documents containing GQS or LQS standard requirements located under the hyperlinked word "References" on the primary page for each GQS/LQS.
Common Quality Practices (CQP)	Written best practices to ensure consistent implementation of some requirements.
Global Resource Documents	Provides guidance in a template format to various Lilly sites on minimum requirements to be considered when creating some necessary documentation. Use of the resource document will deliver consistency in format and meet requirements identified in the applicable GQS.
Standard Operating Procedures (SOP)	Written local practices and instructions for performing all required activities, documentation, and record retention to perform site processes.

L&D: PREPARING DOCUMENTS FOR REVIEW Upon receipt of a proposed new or revised procedure/attachment or training from an initiator, an L&D Document Controller prepares documents for review by completing the following steps.

Step	Action
1	Ensure a Procedure/Attachment/Training Request was submitted on the NALO L&D Collaboration site and all applicable information was provided for each document received.
2	Check that documents are written in active voice with correct spelling and grammar. Ensure changes were made with "Track Changes" in Microsoft Word, if applicable.
3	Address the following: • Check for duplicate information in other documents • Check for other procedures that may need to be revised • If new procedure or training document, check with Submitter to determine if the contents of the new document would be appropriate within an existing document thereby eliminating the need for a new one.
4	Ensure that all Required Elements are present within procedures including the course number and item number with revision in the footer. Attachments must contain the Name of the procedure and the number of pages.
5	Perform the following: • Find all tracked changes and ensure Reasons for Revision and Rationale are provided. Check that reasons for revision clearly, accurately, and completely <u>describe</u> the revisions in the procedure, and provide appropriate justification for making the revisions. • If there are a limited number of changes within the body of the document, indicate changes with an asterisk (*). • If there are extensive changes within the body of the document, indicate in the Reason for Revision section of the procedure that the procedure was revised in its entirety and state rationale for the extensive changes. If the document was revised in entirety, asterisks (*) are not required to be used. ★ Additionally, if the procedure was revised in response to a change control, deviation or audit, the change along with the rationale MUST be noted along with "revised in its entirety". • Any revisions that come from External Agency Commitments must be marked with a star symbol (★) to ensure they are not subsequently deleted and/or altered without careful consideration. QA approval is required to remove or edit a change made in response to an External Agency Commitment.
6	Before adding the drafts to QDocs, check: • The name of the document is consistent with the Title • Track Changes feature is "Off" in Microsoft Word • Page numbers meet formatting requirements for all pages • Superseded procedure number(s) are noted, if applicable • Reasons for Revision in the document cover all changes, and list rationale for each change • Training Course number with Item number and revision number for item is listed and accurate • References are consistent with those listed within the procedure • Final format is satisfactory
7	Add the draft document(s) to QualityDocs and submit for review.

**REVIEWERS:
 REVIEWING
 PROCESS**

The Review workflow allows users to provide document feedback using the Annotations functionality. Multiple users can annotate the document simultaneously and see Annotations from other users in real-time. Reviewers evaluate procedures/attachments and training documents and can make Annotations per IT_GBL: QualityDocs Workflow Participant Training, Item# 9290122.

Note: Documents cannot be checked-out for editing while in a Review workflow. Please contact the Document Controller for an editable copy, if needed.

Upon receipt of an email notification that a task has been assigned in QualityDocs, Reviewers follow the steps below. Tasks may also be located on the user's Home Tab in QualityDocs.

Step	Action
1	Evaluate the proposed procedure/training document. During the evaluation include the following considerations, and others as appropriate: • Based on what I know about this activity and the requirements surrounding this activity, what do I expect to see in this procedure or training document? • Is there a Global Quality Standard which describes the minimum standards for this activity? • Is the document accurate and does it describe what we really do or what really happens? • Is the document consistent within itself (no conflicting information) and consistent with other documents? • For procedures: Do the Reasons for Revision completely, clearly, and accurately indicate <u>WHAT</u> changed in the procedure/training, <u>WHY</u> the change is being made, and provide justification for why it is acceptable to make the change? • For training documents and attachments: Reasons for Revision are located in the Workflow Details section of the document's Metadata. • Does the document clearly describe <u>WHEN</u> steps are performed (what initiates a process or gives direction to start a process)? • Does the document clearly describe <u>WHO</u> will be performing a step (i.e., by title of the area responsible)? • If there are instructions to contact Supervision, Engineering/Maintenance, QA, Management, etc., is it clear what these areas will do when contacted, or why they are being contacted? • If words such as: "appropriate(ly)," "applicable," "correct," and "proper" appear, would a minimally trained person know what is appropriate or proper unless it is clearly stated? • Are the words: should, must, will, may, shall, etc. used correctly? <u>May</u> and <u>should</u> imply that the instruction is optional. <u>Must</u>, <u>will</u> and <u>shall</u> imply that the instruction is mandatory. • Are all options for If/Then statements addressed? • Are all referenced logs, checklists, forms, etc. formally approved (e.g., attachments to an approved procedure, part of a validated software system)? • Are the record retention requirements clearly stated? • If documents referred to in the procedure are to be reviewed/approved, are responsibilities for review/approval clear and documentation of the approval specified?

Continued on next page

**REVIEWERS: REVIEWING
 PROCESS, CONTINUED**

Step	Action						
2	Evaluate the formatting: • Is formatting clear, concise, and suitable for the users to follow? • Does the document contain accurate references within the References section? • Is the document free of typographical and grammatical errors? • Are headings/footers accurate (e.g., page numbers)?						
3	<u>QA Assesses:</u> • The impact on other GMP documents and that the document complies with the Lilly and Global Quality Standards and local procedures • The document meets regulatory and corporate requirements, and that the correct governing standards are referenced • If the document requires any regulatory actions or has any regulatory impact on product. Note: QA must notify L&D document controller of regulatory impact. <u>Safety Representative(s)</u> evaluate whether the procedure/training has the potential to impact safety for potential impact on required personal protective equipment and hazard communication, such as handling potentially hazardous chemicals, or equipment.						
4	Annotations: <table border="1"> <thead> <tr> <th>If</th><th>Then</th></tr> </thead> <tbody> <tr> <td>No changes are needed,</td><td>No Annotation is required.</td></tr> <tr> <td>Changes are needed,</td><td>Add Annotations throughout the document where changes are needed.</td></tr> </tbody> </table> Note: Questions regarding content should not be left for the Document Controller to resolve. Best practice is to direct questions to other reviewers for resolution if they have not already completed their reviews OR contact them or the owner of the process in question directly.	If	Then	No changes are needed,	No Annotation is required.	Changes are needed,	Add Annotations throughout the document where changes are needed.
If	Then						
No changes are needed,	No Annotation is required.						
Changes are needed,	Add Annotations throughout the document where changes are needed.						

APPROVING

Note: For documents on a Retirement workflow, see the “Retiring” section of this procedure.

L&D: PREPARING DOCUMENTS FOR APPROVAL

Upon completion of the review, the L&D Document Controller incorporates comments from Reviewer(s) into the document(s), working with subject matter experts as necessary. If changes are significant, the Document Controller may renew the review in QualityDocs. Otherwise, document(s) are sent to appropriate Approver(s) according to the Minimum Reviewers and Approvers for Procedures and Attachments section of this procedure.

When using a delegate Approver, a Note is placed in the Workflow Details (e.g., Jane Doe approving under Delegation of Authority for John Smith). A link to the effective Delegation of Approval Authority is also placed in this section.

APPROVERS: APPROVING PROCESS

Approval indicates that the document was prepared with your knowledge and that the purpose and scope of the document is correct, and that it has been tasked to appropriate Reviewers and Approvers in QualityDocs.

Note: Approvals in QualityDocs are performed in parallel.

Step	Action
1	View the Reasons for Revision. The evaluation of the documents’ content is not a requirement of Approver(s), but rather is a responsibility of Reviewer(s). Note: For training documents and attachments, Reasons for Revision are in the Workflow Details section of the document’s Metadata.
2	Evaluate the following from knowledge of the Reviewer(s) representing your area(s): • The documents were reviewed by individuals who have the appropriate skills and knowledge to determine if the document(s) completely and without possible misinterpretation describes the steps to accomplish a task so that the operation is performed correctly, consistently, and in accordance with established standards. • All Areas Involved for procedures/attachments had a representative Reviewer.
3	Approve or Reject the document(s) in accordance with IT_GBL: QualityDocs Workflow Participant Training, Item# 9290122. Note: If any Approver rejects, the workflow changes to a Rejected state and the L&D Document Controller returns the document(s) to Draft state to continue with revisions. Any outstanding tasks to other approvers are withdrawn. The L&D Document Controller ensures issues are resolved and re-sends the document(s) for approval to all required approvers or may send the document(s) back for review.

L&D: AFTER APPROVAL

The L&D Document Controller follows the steps below after obtaining approval of the proposed procedure/training:

Step	Action
1	Determine the effective date of the document(s) considering: • Information from Procedure/Attachment/Training Request, • Input from Quality Assurance and affected area personnel, • Date of approval to implement applicable change controls, and/or • Appropriate time to conduct training.
2	Notify Learning Services of effective date.

RETIRING

RETIREMENT PROCESS

*Upon request of a training or procedure/procedure-related document to be retired, the L&D Document Controller and Approvers follow these steps.

Step	Action								
1	L&D: Ensure a Procedure/Attachment/Training Request was submitted on the NALO L&D Collaboration site and all applicable information is provided for each document received.								
*2	L&D: - Enter the reason for retirement in the Retirement Information metadata of the document - Start a Retirement workflow - Choose Approvers per Step 3 - Choose the Retirement Approval Type								
3	L&D: Route document on a Retirement workflow selecting Approvers as follows: <table border="1"> <thead> <tr> <th>If</th><th>Then</th></tr> </thead> <tbody> <tr> <td>GMP documents,</td><td> - Management of the Area(s) Involved - Management, NALO QA </td></tr> <tr> <td>Non-GMP documents,</td><td> - Management of the Area(s) Involved </td></tr> <tr> <td>HSE documents,</td><td> - Management of the Area(s) Involved - Health, Safety and Environmental representative </td></tr> </tbody> </table>	If	Then	GMP documents,	- Management of the Area(s) Involved - Management, NALO QA	Non-GMP documents,	Management of the Area(s) Involved	HSE documents,	- Management of the Area(s) Involved - Health, Safety and Environmental representative
If	Then								
GMP documents,	- Management of the Area(s) Involved - Management, NALO QA								
Non-GMP documents,	Management of the Area(s) Involved								
HSE documents,	- Management of the Area(s) Involved - Health, Safety and Environmental representative								
4	Approvers: Upon receipt of Retirement workflow, review the Rationale for Retirement in the Retirement Information section of the document's Metadata.								
5	Approvers: Consider the following: - Does the reason for retirement apply to all possible Areas Involved? - If any activity or operation described in the document for retirement is still required, is there another document in place to describe the operation for all Areas Involved? - Should the document be reviewed by areas which may not have received the Retirement workflow? - Are there other documents that should be retired due to this document's retirement?								
6	Approvers: Follow IT_GBL: QualityDocs Workflow Participant Training, Item# 9290122 to approve or reject documents.								
7	L&D: Determine: <table border="1"> <thead> <tr> <th>If</th><th>Then</th></tr> </thead> <tbody> <tr> <td>Workflow is approved,</td><td> - Select a retirement date, if necessary. - Notify Learning Services of document's retirement, if necessary. </td></tr> <tr> <td>Workflow is rejected,</td><td> - The workflow immediately ends, and the document remains in an Effective state. Contact document owner or initiator for resolution. </td></tr> </tbody> </table>	If	Then	Workflow is approved,	- Select a retirement date, if necessary. - Notify Learning Services of document's retirement, if necessary.	Workflow is rejected,	The workflow immediately ends, and the document remains in an Effective state. Contact document owner or initiator for resolution.		
If	Then								
Workflow is approved,	- Select a retirement date, if necessary. - Notify Learning Services of document's retirement, if necessary.								
Workflow is rejected,	The workflow immediately ends, and the document remains in an Effective state. Contact document owner or initiator for resolution.								

**DISTRIBUTION,
RETENTION AND
DESTRUCTION**

Training materials are distributed to allow time for adequate training prior to the effective date of the document(s) (e.g., 10 business days) unless requested otherwise by Supervision or Management.

Applicable completed learning histories are sent to Learning Services for course credit, then forwarded to the GMP Library for retention in accordance with the Global Records Retention Schedule.

Check QualityDocs before use to ensure printed materials are effective. Destroy any printed materials confidentially (i.e., by shredding or by placing in a confidential bin).
