1. Introduction

This document is the operating reference for the NALO PDC role at the Plainfield site. It captures two things: how to run the role day to day — the execution rhythm and the decisions behind it — and the practical reference you will reach for constantly, including access and systems, recurring responsibilities, SAP/EWM transactions, key procedures, and contacts.

Start with *Standard Operating Expectations* to understand how the role operates in steady state, then use the reference parts as needed. Links are live, and the access groups and system roles are listed so you can request what you need on day one.

2. Role Summary

The following summarizes the core purpose and scope of the role.

The NALO PDC Operations Associate furthers NALO operations by providing varied business and systems knowledge and support across all warehouse functions, serving an internal and external customer base that includes U.S. wholesalers, U.S. and Puerto Rican sales representatives, LillyCares, government and Alliance customers, and Eli Lilly Export. The role contributes design input and implementation support for business-improvement projects, warehouse capacity and throughput analysis, SAP capabilities, security processes, and inventory management and compliance initiatives, and calls for rapid baseline learning across the operation and the flexibility to move across priorities as needed. On the quality and compliance side, the associate supports regulatory compliance across the NALO DCs, serves as content owner for operations-area SOPs and qualifications, investigates operational events, and drives implementation of appropriate countermeasures and CAPAs — all to an audit-ready standard and in line with data-integrity and good-documentation practices. The role also promotes safe work practices and HSE improvements, supports productivity and budget commitments, and contributes to Operations Excellence and Lean activities and employee engagement. The consistent thread is structured problem-solving applied end to end — identifying a gap, whether in a process, a record, or a tool, and owning the fix from root cause through validated, compliant implementation.

3. Standard Operating Expectations of the Role

3.1 Operating Philosophy

The core of this role is structured problem-solving applied end to end: surface a gap — in a process, a record, or a tool — and own the fix from root cause through validated, compliant closure. Day to day means keeping quality records moving, protecting closure timelines, and making sure the documentation behind every decision would stand up in an audit. The sections below describe the repeatable responsibilities and the judgment behind them, independent of any single event.

3.2 Managing Deviations & CAPAs End-to-End

Every quality record follows the same arc. The work is keeping records moving through it without letting any stall:

1. **Intake & triage.** Confirm the event, assess exposure, and classify it (Minor / Moderate / Major). Open or align the record in Veeva QMS and set a realistic closure date inside the standard execution window.
2. **Investigation.** Gather the facts — SAP/EWM movements, serialization and scan data, batch records, interviews — then apply the right tool: 5-Why for straightforward chains, fishbone to organize contributing factors, fault tree for complex or multi-path failures.
3. **Root cause.** Land on a true root cause and code it to the Lilly Root Cause Map. Disprove competing paths rather than leaving them open.
4. **CAPA definition.** Write corrective and preventive actions with concrete completion criteria, each paired with an owner and a due date. Prefer durable controls (SOP, process, or system changes) over one-time corrections.
5. **Implementation.** Drive the actions to done — SOP updates, retraining, and process or system controls — tracking each to completion.
6. **Effectiveness & recurrence.** Define how effectiveness will be measured, run the effectiveness check on schedule, and confirm the event has not recurred.
7. **Closure.** Assemble the audit-ready package — investigation summary, RCA, CAPA records, impact and bracketing rationale, executive summary — and close cleanly with all references attached.

Timeline rule

Deviation actions carry a six-month execution timeline. If an action cannot close inside that window, the justification must be documented in the TR — this is especially common for automated or third-party-dependent solutions that fall outside the site's direct control.

3.3 Prioritizing the Work

With multiple records open at once, rank them — and re-rank at least weekly, because an item's tier changes as its due date approaches.

Priority tier	What falls here	How to handle it
Overdue / at-risk	Records past due, or trending to miss the six-month window; any open Major; anything with regulatory exposure.	Work first. Review daily. Escalate the same week if a closure date is genuinely threatened.
High-risk (not yet overdue)	Major or Moderate events with product, patient-safety, GxP, serialization/DSCSA, or cold-chain impact; repeat events.	Drive active weekly progress and engage partners early so corrective actions are feasible.
Routine	Minor events, well-understood root causes, single-owner fixes.	Keep a steady cadence and batch similar items. The goal is to keep them from aging into “overdue.”

3.4 Using SAP/EWM Data & Metrics

Data serves two purposes here: it supports investigations, and it monitors whether execution is on track.

To support investigations: reconstruct what happened and quantify impact using batch movements and adjustments (MB51), outbound deliveries (VL03N), the stock and bin overview (/n/SCWM/MON), serial numbers (ZS523), and serialization status (MSC3N). Serialization/DSCSA data (EPCIS/ATTP) confirms scan-level discrepancies and chain of custody.

To monitor execution: the monthly throughput metrics and quarterly inventory reports show whether the operation is on track and surface anomalies early — unexpected adjustments, aging on-hand export material, or count mismatches. Treat an anomaly as a lead for investigation, not just a number to report.

Let the data size the problem

Quantify how many units, batches, or shipments an event touched before writing the assessment. That number drives classification, batch bracketing, and the scope of the CAPA.

3.5 Maintaining Audit-Ready Documentation

Audit-readiness rests on three habits that run continuously, not just at closure:

- **SOP updates.** When a CAPA or a lesson learned changes the process, update the SOP in Veeva Vault — find it by document name, download as Word, mark every edit with an asterisk, add a short description and the rationale (TR#) at the front, then route it via the Procedure Requests form to the document owner. Changes that do not require an immediate procedure update can be captured as a note to file in the document change log for the next scheduled review.
- **Training alignment.** A procedure change is not finished until the people doing the work are trained to it. Confirm the right curriculum and instructor (Learning Plan → Reports → Instructors), assign and track completions, and tie retraining back to the CAPA.
- **Closure practices.** Every record closes with complete, consistent documentation — references attached, fields populated, rationale legible to someone who was not there. Write as if an auditor will read it cold, because eventually one will.

3.6 Tracking & Managing Workload

The role is steady-state ownership of a moving queue. Keep it under control with a few disciplines:

- Maintain one running view of every open record with its owner, due date, and priority tier.
- Watch the backlog trend, not just the count — flat or shrinking is healthy; sustained growth is a signal to escalate or rebalance.
- Protect recurring commitments (monthly metrics, quarterly reports and sweeps, cycle-count uploads) by calendaring them so they go out on time without a reminder.
- Keep clear, single-threaded ownership on every item. An unowned record is the one that quietly ages into overdue.

3.7 Engaging Cross-Functional Partners

Who you pull in depends on the issue. Engage partners early in the investigation — not at the deadline — because corrective actions are only as feasible as the floor and the supporting functions say they are.

Issue type	Primary partners	What you need from them
Deviations / investigations	Anne Jones (Deviation Investigation Owner); area SMEs	Root-cause input, classification concurrence, investigation support
Change controls	Pat Henderson	Change records and SOP-change routing
Activity & training planning	Carrie Seiwert	Activity planning and training assignment
Serialization / DSCSA scan issues	Michael Roach; Rajendra Mudi	Scan logs, system data, chain-of-custody confirmation
Export / IDAP	Robert Bay's team; IDAP Customer Service (Lauren Gooderham); Adam Doughtie	On-hand reports, customer-service coordination, export context
Cold chain / containers	Dave Frische (Transportation); Packaging Engineering; Carlos Morales (Cold Chain COE)	Container qualification, lane data, quantities needed
3PL / DHL reconciliations	Megan Ferguson; Peter Savanhu (DHL)	Reconciliation data and dispositions
Operations execution	Nikki Blum; Bobby Deane; Robert Bay; Anthony Jensen	Floor context and feasibility of corrective actions
Inventory / cycle counts	Jacob Darney (Finance); Pete Ingrassia & Sabry Samuel	Approvals and adjustment sign-off

3.8 When to Escalate

Escalate promptly — and escalate with a recommendation, not just a problem — when:

- A closure date is at risk of breaching the six-month execution timeline (an extension would need justification).
- A new Major event occurs, or any event carries product, patient-safety, regulatory, serialization/DSCSA, or cold-chain exposure.
- A cross-functional blocker is stalling an investigation.
- A pattern or repeat event suggests a systemic issue needing a broader CAPA.
- The backlog is growing faster than it can be worked.

Escalation path: Quality ownership (deviations: Anne Jones; change controls: Pat Henderson) → site leadership.

3.9 What “Good” Looks Like in Steady State

When the role is running well:

- Every open record has a clear, single owner.
- No critical or Major item is overdue; the backlog is flat or shrinking.
- Investigations close within timeline, with documentation an auditor could follow unaided.
- Root causes are coded correctly to the Lilly Root Cause Map; CAPAs have real completion criteria and pass their effectiveness checks.
- Metrics are reviewed on cadence and anomalies are caught before they become events.
- Partners are engaged early; recurring reports go out on time without prompting.
- Execution is consistent and predictable — the role runs on rhythm, not heroics.

4. Getting Started: Access & Systems

4.1 The Basics

- Stay up to date on your Learning Plan.
- Monitor claims and deviations.
- Lead the Process Team.
- Reporting is moving to LillyViz in the future at lillyviz.lilly.com

4.2 Favorites Bar (Key Links)

- [TrackWise-1000 — Home](#)
- [Procedure Requests — Home](#)
- [Receiving Escalations — Tickets](#)
- [Claims Tracker Shared.xlsx](#)
- [NALO Monthly Inventory Metrics — OneDrive](#)
- [TrackWise Tracker: Views — Tableau Server](#)
- [Root Cause Handbook — Enterprise Version.pdf \(saved locally in OneDrive; re-save your own copy\)](#)
- [Report a New Issue to NALO IT — Employee Center](#)
- [Password Vault](#)
- [NALO Operations - Home](#)
- [Claude](#) (Process Team Huddle Board)
- [iObeya](#) (Lead Team Huddle Board)
- [NALO](#) (Monday.com Projects)

4.3 Groups You'll Need Access To

Request via [My Distribution Groups](#).

- **US_Distribution_PLA** — gets you into the PDC Citrix workspace.
- **US_Distribution_PLA_Contractors** ([How to Grant Access for Operations.docx](#))
 - **Request to be an Owner**
- TrackWise_All_1000_Users
- SAPUsers_Manufacturing_2
- Indy_sapgui_Q_UG
- QualityDocs_Doc_Controllers
- PDC_Performance_Metrics
- NALO_DeviationCoP
- INDY_distributionU_GG
- IGNITE
- GQAD_Viewers
- CyberArk_Owners
- CTX_Files_User
- WEN_IN

4.4 MyAccess

Request via [myAccess@Lilly — Home](#).

- QMS HSE Deviation — Lead Investigator (Minor, Moderate, Major)
- QMS Quality Deviation — GMP/Mfg — Lead Investigator (Minor, Moderate, Major)
- QMS Change — Area SME
- QMS Change — Change Control Initiator / Owner
- QMS Continuous Improvement — General User
- BSafe Owner (Intelix) — [Add a BSafe / Observation Reporting](#)
- CyberArk — INFRA-MQIT-SVC-PRD (Tableau)
- CyberArk — JAMF-NALO-ADM-PRD (Warehouse TV)
- Mfg-NALO (Yellow-Public): Document Controller (Veeva)
- EMA\GSC_PowerBI_Access_AAD (Power BI)
- HAM-ASSET-SELF-CERTIFICATION-SECURITY
- TrackWise 1000 — Deviation Investigation Owner (Anne Jones)
- TrackWise 1000 — Activity Planning Owner (Jerry Suddarth)
- TrackWise 1000 — Change Owner (Pat Henderson)
- [ColdStream Select — General User](#)
- ACS-Plainfield-Employee Warehouse 0400-1900 MF
- AM\lillyviz_nalo_site_admin_preprod
- AM\lillyviz_nalo_site_admin_prod
- AM\lillyviz_nalo_user_prod
- Conditional Script Writer

4.5 ServiceNow & Submitting a Ticket

- Visio access for editing flow charts — [search “Visio” in Employee Center](#)
- [Self-Help — M&Q NALO Site Landing Page](#)
- Incident: [Report a New Issue to NALO IT](#)

4.6 Facilities & Personal Setup

- Steel toes — order via [CustomFit Log-In Portal](#)
- Shred-It bin — [Document Shredding](#)

5. Recurring Responsibilities

5.1 Recurring Tasks at a Glance

Recurring task	Tracking / TR #
Quarterly SAP Inventory Report for on-hand material	TR 40771936
Submit cycle counts & inventory adjustments to QDocs	—
Floor Time Checks	TR 40767770 (2025 NALO floortime)
Quarterly Export Sweep	TR 40771936

5.2 Monthly Metric Output Report (Reoccurring the beginning of each month)

1. Log in to S4P, or go to [System Links](#) and choose WEBGUI.
2. VL06O — Outbound Deliveries — DOMESTIC EACH.
3. VL06O — Outbound Deliveries — EXPORT EACHES.
4. VL06O — Outbound Deliveries — NALO SAMPLES.
5. VI06O — Outbound Deliveries — PDC TO 3PL.
6. ZV422 — Variant “USPROMOSHIP.”
7. Download each as an Excel file based on the last date shown in the Power BI metric report ([NALO Throughput Metrics](#)).
8. Upload into the respective folder ([SAP Throughput Reports](#)).

Heads up

Because of SAP changes, each Excel needs manual header changes every month. Use the previous month as a guide and rename the sheet to “Sheet 1.”

5.3 Quarterly SAP Inventory Report for On-Hand Material

- Starts when someone on Robert Bay’s team sends the reports pulled from SAP.
- Attach the three Export Team Lead reports to this action in TrackWise.

- **Execution summary text:** “Three quarterly reports for on-hand export material, ran and sent to export customer service for their review of potential destruction. See attached.”
- Send an email to IDAP CS (Lauren Gooderham) — IDAP_Customer_Service@lists.lilly.com

Process-improvement note

The goal is to eliminate this action: IDAP CS can look in the system to see what is nearing expiry rather than us sending them a sheet. Confirm with their team before retiring it.

5.4 Quarterly Export Sweep

- Go to EWM → /n/SCWM/MON → Stock and Bin → Storage Bin → Print.

Bring issues to the lead team: good documentation practice; this is currently a non-value-add step to be replaced by SMOI and full physical inventory.

5.5 Uploading Cycle Counts & Adjustment Summary to QDocs

- Stored here: [NALO Monthly Inventory Metrics — OneDrive](#)
- Upload instructions: [QDocs Upload Instructions.docx](#)
- **Cycle counts:** Jacob Darney (Finance).
- **Adjustment Summary:** Jen Schultz and Sabry Samuel (Operations and Quality Management).
- Make sure the TR gets approved.

5.6 Determining Who Gives a Specific Training

- From your Learning Plan, go to Reports → Instructors.
- Type the course number into the Item# field.

6. Systems & Operations Reference

6.1 SAP / EWM Transactions

Transaction	What it does
MB51	Look at a batch movement and adjustment
VL03N	Search an outbound delivery
/n/SCWM/MON	Stock and Bin → Stock Overview
SU01D	User Display (check a user's roles)
ZS523	Get the serial numbers of a batch

6.2 How to Check if Something Is Serialized

1. Transaction MSC3N (works in both S4 and EWM).
2. Enter the Material/Batch and press Enter.

3. Select the “Classification” tab.
4. There are two pages you can scroll down on; scroll the inner-most page until you see “Serialized Batch” in the characteristic description column.
5. In EWM the value will be “X” for a serialized batch; in S4 the value will be “YES.”

6.3 Maintaining iPads

- [Maintaining iPads.docx](#)

6.4 Warehouse TV

This is the app you open when making edits.

- [VNC Viewer download \(SharePoint\)](#)
- Open the file that downloads; the machine name will be PDCWKOPSDISP01C.
- Log in with your regular username and password.
- VPN setup details if needed: [Operations Metrics Display Board and Desktop](#)
- [how-to-edit-warehouse-tv.mp4](#)
- Transitions: set slides to advance after 10 seconds.
- Open Set Up Slide Show, then select “Loop continuously until ‘Esc.’”

7. Procedures & Documentation

7.1 Key SOPs

Processes

- [USD-SOP-Product Recpt at PDC-134](#)
- [USD-SOP-Wave Order Processing-086](#)
- [USD-SOP-Replenishment Operations-108](#)
- [USD-SOP-Exacta Mass Pick and Pack-141](#)
- [USD-SOP-Spurs Operations-116](#)
- [USD-SOP-Staging and Shipping-001](#)
- [USD-SOP-Loading Temp Controlled Trucks-001](#)

Product on hold

- [USD-SOP-Quarantine of Finished Products-001](#)
- [USD-SOP-Segregation Process and Scrapped Mtl Processing-001](#)

Miscellaneous

- [USD-SOP-Whse Practices-001](#) (*wide variety of content*)
- [USD-SOP-PIT Safety-001](#) (*includes inbound dock instructions*)
- [USD-SOP-Maintain Drug Prd Inventory-001](#) (*cycle-counting process*)
- [DO23676 — NALO Good Documentation Practices and SPV Training \(p.8\)](#) (*important Good Documentation training*)

Export-specific processes

- [USD-SOP-Export Receiving-152](#)
- [USD-SOP-Export Waving, Picking, and Packing-153](#)
- [USD-SOP-Export Outbound-154](#)
- [NALO Country-Specific Guidelines for Shipping](#)

7.2 Making SOP Edits

1. Find the SOP in Veeva Vault by document name (not by TR#).
2. Download the document as a Word file.
3. Make the necessary edits and put an asterisk next to every edit made.
4. At the beginning of the document, add a description and rationale for each edit. *Description* is short — just why the change was needed; *rationale* is the TR#.
5. Save the document.
6. Fill out the [Procedure Requests form](#) for Adriana records.
7. Send the document to Adriana via email.

7.3 Veeva: Notes to File

Changes that do not need an immediate procedure update can be captured as a note to file in the document change log. They then wait for the next document review.

7.4 Deviation Timeline & Other Notes

- Deviation actions need a six-month execution timeline. If that is not feasible, include the justifying reason in the TR.
- Per Brandon: as we move to more automated solutions, those are often outside our walls and difficult to control on timeline — document that context (service now #, change control #) when it applies.

8. Key Contacts

8.1 Operations — Area Owners & Direct Team

Name	Purpose for contact	Location
Nicole “Nikki” Easton Blum	Spurs, replenishment, dock / inbound–outbound execution	NALO PDC
Robert “Bobby” L. Deane	Picking, mass pick & pack, destruction	NALO PDC
Robert Dale Bay	Export and promo operations; export follow-ups and action reviews	NALO PDC
Anthony Jensen	Extended-shift operations	NALO PDC
Ivan Wayne Valentour	Senior operations support; deviations/CAPA guidance; transition and recurring compliance/ops alignment	NALO PDC

Name	Purpose for contact	Location
Kaaron Carter	Operational excellence, capacity modeling, export/labor modeling, strategic planning	NALO PDC
Kennedy O’Neail	Supply Chain intern — export 5S, LillyViz/huddles, follow-up workstreams	NALO PDC
Michael Noah Roach	Metrics / reporting; TrackWise tracker; business-integrator support; ops updates	NALO PDC
Andrew J. Sampson	Ops manager; recurring ops process-team participant; Veeva / ops dashboard coordination	EDC

8.2 Operations Leadership & Lead Team

Name	Purpose for contact	Location
Pete Ingrassia	Lead team organizer; senior logistics leadership; lead-team decisions and escalations	NALO PDC
Brandon Bowler	Operations leadership; priorities, escalations, support-staff alignment	NALO PDC
Yugandhar Prashant Yawatkar	Lean coach; LillyViz/huddle ownership; cadence/priority alignment	NALO PDC
David “Dave” J. Frische	Transportation leadership — international/domestic transportation	NALO PDC
Jamil D. Shabazz	Tech@Lilly / business solutions; NALO systems and IT coordination	NALO PDC
Sabry Samuel	Site quality / distribution leadership; protocol / change-control direction	NALO PDC
Sean Couch	Associate Director, Operations Strategy; 3PL / labor-model / capacity and external-logistics coordination	NALO PDC
Melissa Wienke	Safety and maintenance leadership	NALO PDC
Jacob Darney	Finance — inventory adjustments / cycle-count approvals	Finance
Eric Prescott	Associate Director, HR Business Partner — Global Supply Chain and Central TSMS	MC/21/05
Eric Thomas	Customer service and supply chain leadership; CS / SC representative and sample / customer-service coordination	NALO PDC

Name	Purpose for contact	Location
Tia Lanee Thomas	Pharmacist / Global Supply Chain leadership; NALO lead team member	MC/88/02

8.3 Quality, Compliance, Deviations & Training

Name	Purpose for contact	Location
Anne E. Jones	Site compliance lead; Veeva/dashboard issues; deviation/CoP and compliance oversight; deviations owner	NALO PDC
Patrick B. Henderson	QA/backlog and NRB support; TrackWise tracker; investigation follow-up; change controls	NALO PDC
Sabry Samuel	Site quality/distribution leadership; quality clarifications; protocol/change-control direction	NALO PDC
Carrie Seiwert	QA logistics operations; floor-time/QA logistics review; GEOX/protocol touchpoints	NALO PDC
Donald “Don” Pennington	QA — deviation entry, issue escalation, claims-issue quality coordination	NALO PDC
Rita Lo	QA logistics operations; risk facilitation/FMEA support; floor-time program; L&L support	NALO PDC
Katie Little	NALO QA distribution — deviation evidence/photos and deviation review support	NALO PDC
Bruce D. Klemmensen	QA distribution support; quality input/escalation on CAPA and external supplier quality	NALO PDC
Julie A. Kemp *Retired Routing will be done through Adriana Dominguez	Learning & development / training workflow; effective-date and training-assignment follow-up	NALO PDC

8.4 Customer Service, Claims & Fulfillment

Name	Purpose for contact	Location
Brian Prater	Customer service leadership; packlist/customer-service clarification; claims support	NALO PDC
Julee Bjerke	Trade claims / shortage investigations	NALO PDC
Clare Kuuipo Cross	Customer-service support for Qualanex / returns / destruction / shipment follow-up	NALO PDC
Jody Werner	Fulfillment and trade-relations leadership; customer-service fulfillment chain	NALO PDC

Name	Purpose for contact	Location
Ethan Gastineau	Supply chain / customer-service fulfillment; planning/dock dashboard sharing; intern coordination	NALO PDC

8.5 Engineering, Maintenance & Safety

Name	Purpose for contact	Location
Anthony Cockell	Packaging engineer — protocols, FMEAs, TempTales, packaging change control; local container contact	NALO PDC
Mariah Tinker Schuette	Process engineering — 40L conveyor, export racking/risk assessments, export 5S engineering actions	NALO PDC
Jacob Hill	Process engineer — layouts/CAD, risk-team participation, process-engineering support	NALO PDC
Brett Mason	Safety/HSE — export 5S actions, safety/risk assessments, stop-work/safety inputs	NALO PDC
Chad W. Surber	NALO maintenance — facility/equipment support; export-area maintenance items	NALO PDC
Melissa Wienke	Safety and maintenance leadership	NALO PDC
Jeffrey M. Chida	Packaging / active-passive container and shipping qualification support	NALO PDC

8.6 Export, Transportation, IDAP & 3PL

Name	Purpose for contact	Location
Justin Binette	Export operations; export 5S action follow-up	NALO PDC
Matthew Martin	Export operations	NALO PDC
Jared Holycross	Export operations; country-specific shipping guideline updates; export execution knowledge	NALO PDC
David “Dave” J. Frische	Transportation leadership — international/domestic transportation; export-capacity discussions	NALO PDC
Robert Lane Kellar	Lilly transportation contact; transportation logistics support	NALO PDC
Jared Saddoris	3PL operations strategy	NALO PDC
Adam Doughtie	IDAP warehouse operations; IDAP Sr Lead Operator	IDAP
Geoff Ladue	IDAP logistics lead / warehouse leadership	IDAP Warehouse Operations

Name	Purpose for contact	Location
Gabrielle Gahwiler	IDAP master scheduler; scheduling / master-plan support	IDAP Supply Chain
Vitoria Nadolskis Severine Khalaff Soleiman Soto	IDAP supply chain leadership Cold-chain / TempTale / GEOX protocol contact; Supply Chain Associate	IDAP Warehouse Operations Cold Chain COE
Mia Rumler	Supply chain — GEOX / implementation discussions	Business Lifecycle Management

8.7 Passive & Active Containers (Shippers)

Name	Purpose for contact	Location
David “Dave” J. Frische	Transportation — quantities needed for export; loading Puerto Rico shippers	NALO PDC
Jeffrey M. Chida	Global container / shipping qualification	NALO PDC
Anthony Cockell	Local container contact (was Reagan Dugan)	NALO PDC

8.8 DHL & External Packaging

Name	Purpose for contact	Location
Megan Ferguson	DHL operations — megan.ferguson@dhl.com	DHL
Peter (Tarumbidzwa) Savanhu	DHL US manager — tarumbidzwa.savanhu@dhl.com	DHL

8.9 Tech, Systems & LillyViz

Name	Purpose for contact	Location
Jamil D. Shabazz	Tech@Lilly / business solutions; NALO systems and IT coordination	Tech@Lilly Global Supply Chain
Tony Huck	Business process architecture / NALO Tech@Lilly; risk-team member on dock/process work	NALO PDC
Rajendra Mudi	Tech / serialization / Exacta support; IT investigation support for deviations and data mismatches	MQ Tech@Lilly NALO
Maurya R. Thota	LillyViz / data insights manager; standups and site-connect support	IC/170/01
Aditya Kumar	LillyViz / automated metrics / site-hierarchy support	Global MQ Quality Tech@Lilly
Teresa Taylor	Technical writer — SOP update coordination; SharePoint access questions	NALO PDC
Fran Blauw	Technical writer — deviation-document questions; tech-writer request field support	NALO PDC

Name	Purpose for contact	Location
Nikhil Anand Dhoka	Prior POC/hierarchy and shared-metrics work (now in a different org)	Legal Engineering & AI Platforms

8.10 Procurement & Supplier QA

Name	Purpose for contact	Location
Lucia Tartaglia	Procurement — Sonoco / work-order / agreement path forward	Global Services Procurement
Joel Goodwin	Affiliate logistics QA — supplier / agreement quality path questions	MC/21/03
Andrew Tolley	Global logistics / affiliate QA — Sonoco / agreement quality input	MC/21/03

8.11 Global Logistics & Cold Chain

Name	Purpose for contact	Location
Joel Goodwin	Quality (Global Logistics)	MC/21/03
Carlos Morales	Cold Chain COE Manager	Cold Chain COE
Carlos Diaz Barriga	Lead TS/MS	Global Logistics
Khalaff Soleiman Soto	Supply Chain Associate; cold chain / GEOX	Cold Chain COE

9. Open Projects

Project	Owner(s)	Description	Veeva or TR # (if applicable)	Current Status	Link(s)
LillyViz	Kennedy O'Neail / Yugandhar Yawatkar / New SCALE	The LillyViz project is a digital huddle board implementation initiative designed to replace or standardize existing operational boards (e.g., iObeya) with a centralized, data-driven platform for daily operational management across NALO.	N/A	Please see Monday.com	- LillyViz introduction video: DIA Demo NextGen LillyViz 2025.10.mp4 - LillyViz presentation: Nextgen LillyViz 2.pptx - NALO walkthrough of the platform: NALO Homemade LillyViz Demo Video.mp4 (1.5x speed may be helpful) - LillyViz login: https://lillyvizprod.lilly.com/dashboard/ (once myAccess is approved and role is added)
40L Line Samples	Mariah Schuette / New SCALE	The 40L project is a process improvement initiative to expand and redesign the 40L sample line at NALO to meet growing demand. It involves installing a new production line and conveyor system, converting the process from batch to continuous flow, and optimizing layout and material movement. The project also focuses on improving safety, ergonomics, and reducing deviations while significantly	TR # 40964668	- Conveyor specs are being sent to Vendor - Conveyor Install - SOP Updates and training (Work with Bobby Deane & Team)	40L Coolers

Project	Owner(s)	Description	Veeva or TR # (if applicable)	Current Status	Link(s)
		increasing throughput capacity.			
Export 5S	Kennedy O'Neail / Yugandhar Yawatkar / New SCALE	The Export 5S project is a workplace organization initiative in NALO PDC's Export area aimed at scaling outbound capacity to 13 trucks per day. The main physical change is removing two 3-deep pushback racks on the northeast wall of PLA1 to create additional pallet staging lanes and a guarded pedestrian walkway. The project applies all five 5S pillars and was formally managed through Veeva Vault under CC-001704, with a supporting Power Automate flow to track weekly action items in SharePoint.	CC-001704	Please see Monday.com Wrapping up Actions by July 15 th	Export 5S Project - Home
NALO 3D Simulation	Phillip Poor, Kaaron Carter, Dave Anderson, New SCALE	3D simulation model being built in Flex Sim for NALO.		Finishing Inbound Dock. Weekly meetings occur on progress.
